Independent Auditors' Report

To the Shareholders of ACE Aviation Holdings Inc.

We have completed an integrated audit of the consolidated financial statements and internal control over financial reporting of ACE Aviation Holdings Inc. (the "Corporation") as of December 31, 2006 and an audit of its December 31, 2005 consolidated financial statements. Our opinions, based on our audits, are presented below.

Consolidated financial statements

We have audited the accompanying consolidated statements of financial position of ACE Aviation Holdings Inc. as of December 31, 2006 and December 31, 2005, and the related consolidated statements of operations and retained earnings and cash flows for the years then ended. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audit of the Corporation's financial statements as of December 31, 2006 and for the year then ended in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). We conducted our audit of the Corporation's financial statements as of December 31, 2005 and for the year then ended in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. A financial statement audit also includes assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Corporation as of December 31, 2006 and December 31, 2005 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

As discussed in Note 2 to the financial statements, the Corporation adopted Emerging Issues Committee Abstract ("EIC") 162, Stock-Based Compensation for Employees Eligible to Retire before the Vesting Date, which changed its method of accounting for stock options granted to employees eligible to retire at the grant date or during the vesting period.. As discussed in Note 23, the

To the Shareholders of ACE Aviation Holdings Inc. February 13, 2007

Corporation adopted Statement of Financial Accounting Standard ("SFAS") 123(R), Share-Based Payments, which changed its method of accounting for stock-based compensation and SFAS 158, Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R), which requires the Corporation to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income.

Internal control over financial reporting

We have also audited management's assessment, "Management's report on internal control over financial reporting" located in Section 17 of the Corporation's Management's Discussion and Analysis of Results of Operations and Financial Condition, that the Corporation did not maintain effective internal control over financial reporting as of December 31, 2006, because of the effect of limitations in the Corporation's ability to identify all future income tax assets and liabilities with respect to nonroutine and complex business transactions in the Corporation's December 31, 2006 consolidated financial statements based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and on the effectiveness of the Corporation's internal control over financial reporting based on our audit.

We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

To the Shareholders of ACE Aviation Holdings Inc. February 13, 2007

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a control deficiency, or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The following material weakness has been identified and included in management's assessment. There were limitations in the Corporation's ability to identify all future income tax assets and liabilities with respect to non-routine and complex business transactions in the Corporation's December 31, 2006 consolidated financial statements. This control deficiency resulted in audit adjustments to the December 31, 2006 consolidated financial statements. This control deficiency could result in a material misstatement in the Corporation's consolidated financial statements that would not be prevented or detected. This material weakness was considered in determining the nature, timing, and extent of audit tests applied in our audit of the December 31, 2006 consolidated financial statements, and our opinion regarding the effectiveness of the Corporation's internal control over financial reporting does not affect our opinion on those consolidated financial statements.

In our opinion, management's assessment that the Corporation did not maintain effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on criteria established in *Internal Control - Integrated Framework* issued by the COSO. Also, in our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, the Corporation has not maintained effective internal control over financial reporting as of December 31, 2006 based on criteria established in *Internal Control - Integrated Framework* issued by the COSO.

For the year ended December 31, 2006 (currencies in millions – Canadian dollars)

1. NATURE OF OPERATIONS AND ACCOUNTING POLICIES

ACE Aviation Holdings Inc. ("ACE") incorporated on June 29, 2004, is an investment holding company of various aviation interests. Reference to the "Corporation" in the following notes to the consolidated financial statements refers to, as the context may require, ACE and its subsidiaries collectively, ACE and one or more of its subsidiaries, one or more of ACE's subsidiaries, or ACE itself.

ACE has four reportable segments: Air Canada Services, Aeroplan Limited Partnership ("Aeroplan"), Jazz Air LP ("Jazz"), and ACTS Limited Partnership ("ACTS").

As at December 31, 2006, ACE holds:

- a 75.0 percent direct ownership interest in Air Canada, the principal entity included in the Air Canada Services segment,
- a 75.3 percent ownership interest in Aeroplan, including a 50.3 percent direct ownership in Aeroplan LP and the remainder held in the Aeroplan Income Fund (50.3 percent ownership interest in Aeroplan after January 10, 2007 as described in Note 24):
- a 79.7 percent direct ownership interest in Jazz; and
- a 100 percent ownership interest in ACTS.

The Air Canada Services segment is comprised of the entities previously included within the Transportation Services segment with the exception of the activities of the ACE stand-alone entity and certain consolidation adjustments that are now included within Corporate Items and Eliminations ("CIE"). As a result of these changes, the comparative segment disclosures have been restated to reflect the current reportable segment structure.

Air Canada Services

Air Canada Services includes the Corporation's principal passenger and cargo transportation services business operated by Air Canada and related ancillary services.

These services are provided through Air Canada, AC Cargo Limited Partnership ("Air Canada Cargo"), ACGHS Limited Partnership ("ACGHS"), and Touram Limited Partnership ("Air Canada Vacations"). The Air Canada Services segment includes the transportation revenues related to aircraft operated by Jazz Air LP ("Jazz" or "Jazz LP") and rental income from aircraft leased to Jazz by subsidiaries of Air Canada and the costs related to fees paid to Jazz, as provided for under a capacity purchase agreement.

Air Canada is Canada's largest domestic and international full-service airline and the largest provider of scheduled passenger services in the domestic market, the US transborder market as well as Canada-International markets to and from Canada. Through Air Canada's global route network, virtually every major market throughout the world is served either directly or through the Star Alliance network. Air Canada is a founding member of the Star Alliance network which is the world's largest airline alliance group.

Air Canada and Air Canada Cargo provide air cargo services on domestic, US transborder and international flights. Air Canada Cargo is a major domestic air cargo carrier and uses the entire cargo capacity on aircraft operated by Air Canada and Jazz on domestic and transborder routes. Air Canada offers cargo services on its international flights and currently uses two chartered all freighter aircraft to supplement Canada-Europe and Canada-Asia services. Air Canada Cargo manages all international cargo and freighter operations on behalf of Air Canada.

Air Canada Ground Handling Services provides passenger handling services to Air Canada, Jazz and other airlines with a primary focus on Canadian stations. Services covered include passenger check-in, gate management, baggage and cargo handling and processing, cabin cleaning, de-icing as well as aircraft ramp services.

Air Canada Vacations (51% owned directly by Air Canada and 49% owned directly by ACE) is a major Canadian tour operator providing tour operator services and vacation packages which include air transportation

supplied by Air Canada, hotel accommodations, car rentals and cruises. Air Canada Vacations also sells surplus seat inventory to travel agents under the trade name Netair.

Aeroplan

Aeroplan is a premier loyalty program which offers miles accumulation and redemption to members as an incentive to the Corporation's and other commercial partners' customers. Members may redeem accumulated mileage for travel rewards or for goods and services from non-airline partners.

Jazz

Jazz is a regional carrier which provides service to Air Canada's customers in lower density markets and in higher density markets at off-peak times throughout Canada and to certain destinations in the United States under a capacity purchase agreement between Air Canada and Jazz that came into effect September 30, 2004 (the "Initial Jazz CPA"), which was amended and restated effective January 1, 2006 (the "Jazz CPA"). Under the Jazz CPA, Jazz focuses on flight operations and customer service and Air Canada is responsible for scheduling, marketing, pricing and related commercial activities of the regional operations. Under the Jazz CPA, Jazz records revenues from Air Canada based upon fees relating to flight operations performed, passengers carried and other items covered by the agreement. These inter-company transactions are eliminated in these consolidated financial statements. The Air Canada Services segment records the revenue on flights operated under the Jazz CPA in Passenger revenue.

ACTS

ACTS provides technical services and competes on a global basis as an aircraft maintenance, repair and overhaul service provider.

Additional financial information on ACE operating segments is outlined in Note 14, Segment Information.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A) BASIS OF VALUATION

In accordance with Section 1625 of the CICA Handbook, Comprehensive Revaluation of Assets and Liabilities ("CICA 1625"), ACE adopted fresh start reporting on September 30, 2004. As a result of the financial reorganization under CCAA, the assets and liabilities of the consolidated entity, excluding goodwill, were comprehensively revalued to fair values. A revaluation adjustment of \$1,655 was recorded to shareholders' equity.

B) PRINCIPLES OF CONSOLIDATION

These consolidated financial statements include the accounts of the Corporation and its subsidiaries operations described in Note 1, with provisions for non-controlling interests. The consolidated financial statements of the Corporation include the accounts of variable interest entities for which the Corporation is the primary beneficiary. All inter-company and inter-entity balances and transactions are eliminated.

C) USE OF ESTIMATES

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

D) PASSENGER AND CARGO REVENUES

Airline passenger and cargo advance sales are deferred and included in current liabilities. Passenger and cargo revenues are recognized when the transportation is provided, except for revenue on unlimited flight passes which is recognized on a straight-line basis over the period during which the travel pass is valid. The Corporation has formed alliances with other airlines encompassing loyalty program participation, code sharing and coordination of services including reservations, baggage handling and flight schedules. Revenues are allocated based upon formulas specified in the agreements and are recognized as transportation is provided. As described further under Aeroplan Loyalty Program, the estimated fair value of Aeroplan Miles earned through qualifying air travel is deferred at the time the qualifying air travel is provided. Deferred revenues from the issue of Miles ("Miles") to customers, including Miles sold to loyalty program partners are recorded as passenger revenues when the transportation is provided. Redemptions for non-passenger services are included in other revenues.

The Corporation performs regular evaluations on the deferred revenue liability which may result in adjustments being recognized as revenue. Due to the complex pricing structures; the complex nature of interline and other commercial agreements used throughout the industry; historical experience over a period of many years; and other factors including refunds, exchanges and unused tickets, certain relatively small amounts are recognized as revenue based on estimates. Events and circumstances may result in actual results that are different from estimates; however these differences have historically not been material.

E) CAPACITY PURCHASE AGREEMENTS

Air Canada has capacity purchase agreements with certain unaffiliated regional carriers, which are referred to as Tier III carriers, operating aircraft of 18 seats or less. Under these agreements, Air Canada is responsible for the marketing, ticketing and commercial arrangements relating to these flights and records the revenue it earns under passenger revenue. For the year ended December 31, 2006, passenger revenues under capacity purchase agreements with Tier III carriers amounted to \$68 (\$70 - 2005). Operating expenses under capacity purchase agreements with Tier III carriers are recorded primarily in the aircraft fuel, airport and navigation fees and other operating expense categories.

F) AEROPLAN LOYALTY PROGRAM

Miles earned by members through transportation services provided by the Corporation and the transportation services are treated as multiple elements. Miles are recorded at fair values with the residual allocated to transportation services. The proceeds from the sale of Miles to loyalty program commercial partners are deferred.

Revenues from Miles issued to members are recognized at the time the Miles are redeemed except for breakage as noted below. Miles redeemed for travel on Air Canada and Jazz are included in Passenger revenue and Miles redeemed for other than travel are included in Other revenues.

Based on historical experience and current program policies the Corporation estimates the percentage of Miles that are not expected to be redeemed, defined as breakage. Breakage is estimated by the Corporation based on the terms and conditions of membership and historical accumulation and redemption patterns as adjusted for changes to any terms and conditions that affect members' redemption practices. The estimated breakage factor is 17%. Changes in the breakage factor are accounted for as follows: in the period of change, the deferred revenue balance is adjusted as if the revised estimate had been used in prior periods with the offsetting amount recorded as an adjustment to Other revenues; and for subsequent periods, the revised estimate is used. The amount allocated to breakage is recognized in Other revenues on a straight line basis over a period of 30 months, which is the estimated average life of a Mile.

The current portion of Aeroplan loyalty program deferred revenues of \$857 (2005 – \$680) is based on Management's estimate as to the portion of the liabilities that will be redeemed in the next twelve months. The remainder of the liabilities is carried in Aeroplan deferred revenues.

G) OTHER REVENUES

Other revenue includes certain loyalty program revenues, as described above, as well as revenues from technical services maintenance and other airline related services.

Revenues relating to airframe maintenance services are recognized as the services are performed. Revenues and costs relating to engine and component maintenance services are deferred and only recognized once the work has been completed.

Certain maintenance contracts are referred to as power by the hour whereby the customer makes payments based on their aircraft utilization. Customer receipts under a power by the hour contract are deferred in current liabilities and recognized as revenues as maintenance services are performed.

Other airline related service revenues are recognized as services are provided.

H) EMPLOYEE FUTURE BENEFITS

The cost of pensions, other post-retirement and post-employment benefits earned by employees is actuarially determined using the projected benefit method prorated on service, market interest rates, and management's best estimate of expected plan investment performance, salary escalation, retirement ages of employees and expected health care costs.

A market-related valuation method is used to value plan assets for the purpose of calculating the expected return on plan assets. Under the selected method, the differences between investment returns during a given year and the expected investment returns are amortized on a straight line basis over 4 years.

Past service costs arising from plan amendments are amortized on a straight-line basis over the average remaining service period of employees active at the date of amendment. This period does not exceed the average remaining service period of such employees up to the full eligibility date. The average remaining service life for the plans is between 7 and 17 years.

Cumulative unrecognized net actuarial gains and losses in excess of 10% of the greater of the projected benefit obligation or market-related value of plan assets at the beginning of the year are amortized over the remaining service period of active employees.

I) EMPLOYEE PROFIT SHARING PLAN

The Corporation has employee profit sharing plans. Payments are calculated annually on full calendar year results and recorded throughout the year as a charge to salary and wage expense based on the estimated annual payment under the plan.

J) STOCK-BASED COMPENSATION PLANS

Certain employees of the Corporation participate in the ACE, Air Canada, Aeroplan and Jazz stock based compensation plans, as described in Note 11.

On July 6, 2006, the Emerging Issues Committee of the Accounting Standards Board of Canada issued EIC-162 – Stock-based compensation for employees eligible to retire before the vesting date. Prior to the adoption of EIC-162, the fair value of stock options granted was recognized as a charge to salaries and wages expense on a straight line basis over the applicable vesting period, without regard to when an employee was eligible to retire. EIC-162 is applicable to the Corporation as the terms of the Corporation's stock option plan specify that upon the retirement of the employee, options granted may be exercised as the rights to exercise accrue.

The Corporation adopted EIC-162 during 2006 with restatement of prior periods. The impact in these financial statements of adopting EIC-162 is a charge to retained earnings of \$16 as at January 1, 2005 and \$13 as at January 1, 2006, a decrease to Salaries, wages and benefits expense of \$3 for the year ended December 31, 2005 offset against Contributed Surplus. The basic and diluted earnings per share increased by \$0.03 for the year ended December 31, 2005 as a result of adopting EIC-162.

The fair value of stock options or units granted to Corporation employees is recognized as compensation expense and a credit to contributed surplus on a straight line basis over the applicable vesting period. For a stock option or unit award attributable to an employee who is eligible to retire at the grant date, the fair value of the stock option or unit award is expensed on the grant date. For a stock option or unit award attributable to an employee who will become eligible to retire during the vesting period, the fair value of the stock option or unit award is recognized over the period from the grant date to the date the employee becomes eligible to retire. The amount of compensation cost recognized at any date at least equals the value of the vested portion of the options at that date.

ACE, Air Canada, Aeroplan and Jazz also maintain employee share and unit purchase plans for shares and units. Under these plans, contributions by the Corporation's employees are matched to a specific percentage by the Corporation. These contributions are included in salaries, wages and benefits expense.

K) MAINTENANCE AND REPAIRS

Maintenance and repair costs are charged to operating expenses as incurred, with the exception of maintenance and repair costs related to return conditions on short-term aircraft leases, which are accrued over the term of the lease.

L) OTHER OPERATING EXPENSES

Included in other operating expenses are expenses related to building rent and maintenance, terminal handling, professional fees and services, crew meals and hotels, advertising and promotion, insurance costs, credit card fees, Aeroplan Miles redeemed for other than travel, ground costs for Air Canada Vacations packages, and other expenses. Expenses are recognized as incurred.

M) FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

Under the Corporation's risk management policy, derivative financial instruments are used only for risk management purposes, not for generating trading profits. When the Corporation utilizes derivatives in hedge accounting relationships, the Corporation identifies, designates and documents those transactions and regularly tests the transactions to demonstrate effectiveness in order to continue hedge accounting. To the extent that a derivative financial instrument does not qualify for hedge accounting or for those that are not designated as hedges, the fair value of the derivative financial instrument is recorded on the consolidated statement of financial position and changes in its fair value are recorded in income in the period when the change occurs.

Changes in the fair value of foreign currency forward contracts, option agreements and currency swap agreements used for foreign exchange risk management but not designated as hedges for accounting purposes, are recorded in foreign exchange gain (loss). These contracts are included in the consolidated statement of financial position at fair value in Accounts receivable and Accounts payable and accrued liabilities.

The Corporation from time to time enters into interest rate swaps to manage the risks associated with interest rate movement on US and Canadian floating rate debt and investments, including anticipated debt transactions.

Changes in the fair value of these swap agreements, which are not designated as hedges for accounting purposes, are recognized in income in Other non-operating income and are recorded on the consolidated statement of financial position in Other assets and Other long-term liabilities.

Derivatives under the fuel-hedging program are designated as hedges for accounting purposes and hedge accounting is being applied prospectively from October 1, 2005. Under hedge accounting, gains or losses on fuel hedging contracts are recognized as a component of aircraft fuel expense when the underlying jet fuel being hedged is consumed. Premiums paid for option contracts and the excluded time value of the options is deferred as a cost of the hedge in the consolidated statement of financial position in Other assets and recognized in Fuel expense at the same time as the hedged jet fuel is consumed. Similarly, the value of the derivatives previously measured at fair value where the Corporation did not apply hedge accounting is also treated as a cost of the hedge and accounted for in the same way. Prior to these derivative instruments being designated as hedges for accounting purposes, gains or losses are recorded in other non-operating expense.

The Corporation will discontinue hedge accounting when the hedge item matures, expires, is sold, terminated, cancelled or exercised, the Corporation terminates its designation of the hedging relationship, the hedging relationship ceases to be effective, or the anticipated transaction is no longer probable.

When a hedging item ceases to exist and is not replaced, any gains, losses, revenues or expenses associated with the hedging item that have been deferred previously as a result of applying hedge accounting are carried forward to be recognized in income in the same period as the corresponding gains, losses, revenues or expenses associated with the hedged item.

When a hedged item ceases to exist or an anticipated transaction is no longer probable, any gains, losses, revenues or expenses associated with the hedging item that had been deferred previously as a result of hedge accounting are realized in the current period's statement of operations.

N) FOREIGN CURRENCY TRANSLATION

Monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars at rates of exchange in effect at the date of the consolidated statement of financial position. Non-monetary assets, non-monetary liabilities, revenues and expenses arising from transactions denominated in foreign currencies, are translated at rates of exchange in effect, which is based on an average for the month. Adjustments to the Canadian dollar equivalent of foreign denominated monetary assets and liabilities due to the impact of exchange rate changes are classified on the consolidated statement of operations as a foreign exchange gain or loss.

O) INCOME TAXES

The Corporation utilizes the liability method of accounting for income taxes under which future income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amount and the tax basis of assets and liabilities. Future income tax assets and liabilities are measured using substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on future income tax assets and liabilities of a change in tax rates is recognized in earnings in the period that includes the enactment date. Future income tax assets are recognized to the extent that realization is considered more likely than not.

P) CASH AND CASH EQUIVALENTS

Cash includes \$1,730 pertaining to investments with original maturities of three months or less at December 31, 2006 (2005 – \$1,540). Investments include bankers acceptances, bankers discount notes, and commercial paper, which may be liquidated promptly and have original maturities of three months or less. The weighted average interest rate on investments as at December 31, 2006 is 4.30% (2005 – 3.31%).

Q) SHORT-TERM INVESTMENTS

Short-term investments, comprised of bankers acceptances and bankers discount notes, have original maturities over three months, but not more than one year. The weighted average interest rate on short-term investments as at December 31, 2006 is 4.31% (2005 – 3.04%).

R) RESTRICTED CASH

As at December 31, 2006, the Corporation has recorded \$109 (2005 – \$86) in restricted cash, under current assets, representing funds held in trust by Air Canada Vacations in accordance with regulatory requirements governing advance ticket sales, recorded under current liabilities, for certain travel related activities.

S) SPARE PARTS, MATERIALS AND SUPPLIES

Spare parts, materials and supplies are valued at the lower of average cost and net realizable value. A provision for the obsolescence of flight equipment spare parts is accumulated over the estimated service lives of the related flight equipment to a 30% residual value.

T) PROPERTY AND EQUIPMENT

Property and equipment is originally recorded at cost. Property under capital leases and the related obligation for future lease payments are initially recorded at an amount equal to the lesser of fair value of the property or equipment and the present value of those lease payments. On the application of fresh start accounting effective September 30, 2004, the cost of the Corporation's property and equipment was adjusted to fair value. In addition, the estimated useful lives of certain assets were also adjusted, including buildings where useful lives were extended to periods not exceeding 50 years.

Property and equipment are depreciated to estimated residual values based on the straight-line method over their estimated service lives. Property and equipment under capital leases and variable interest entities are depreciated to estimated residual values over the life of the lease. Aircraft and flight equipment are depreciated over 20 to 30 years, with 10% to 20% estimated residual values. Aircraft reconfiguration costs are amortized over 3 years. Betterments to owned aircraft are capitalized and amortized over the remaining service life of the aircraft. Betterments to aircraft on operating leases are amortized over the term of the lease.

Buildings are depreciated over their useful lives not exceeding 40 to 50 years on a straight line basis. An exception to this is where the useful life of the building is greater than the term of the land lease. In these circumstances, the building is depreciated over the life of the lease. Leasehold improvements are amortized over the lesser of the lease term or 5 years. Ground and other equipment is depreciated over 3 to 25 years.

U) INTEREST CAPITALIZED

Interest on funds used to finance the acquisition of new flight equipment and other property and equipment is capitalized for periods preceding the dates that the assets are available for service. Capitalized interest related to the acquisition of new flight equipment and other property and equipment is included in purchase deposits within Property and equipment (refer to Note 3). Capitalized interest also includes financing costs charged by the manufacturer on capital commitments as described in Note 15.

V) DEFERRED FINANCING COSTS

Deferred financing costs are amortized on an effective interest basis over the term of the related obligation.

W) INTANGIBLE ASSETS

As a result of the application of fresh start reporting, intangible assets were recorded at their estimated fair values at September 30, 2004. Indefinite life assets are not amortized while assets with finite lives are amortized to nil over their estimated useful lives.

	Estimated Useful Life
International route rights and slots	Indefinite
Air Canada trade name	Indefinite
Aeroplan trade name	Indefinite
Other marketing based trade names	Indefinite
Aeroplan contracts	25 years
Star Alliance membership	25 years
Other contract and customer based intangible assets	10 to 15 years
Technology based intangible assets	1 to 25 years

X) IMPAIRMENT OF LONG-LIVED ASSETS

Long-lived assets are tested for impairment whenever circumstances indicate that the carrying value may not be recoverable. When events or circumstances indicate that the carrying amount of long-lived assets, other than indefinite life intangibles, are not recoverable, the long-lived assets are tested for impairment by comparing the estimate of future expected cash flows to the carrying amount of the assets or groups of assets. If the carrying value is not recoverable from future expected cash flows, any loss is measured as the amount by which the asset's carrying value exceeds fair value. Recoverability is assessed relative to undiscounted cash flows from the direct use and disposition of the asset or group of assets.

Indefinite life intangible assets are subjected to impairment tests under Canadian GAAP on an annual basis or when events or circumstances indicate a potential impairment. If the carrying value of such assets exceeds the fair values, the assets are written down to fair value.

Y) INVESTMENTS

Investments not subject to significant influence are carried at cost and any declines in value that are determined to be other than temporary are included in earnings. Earnings from such investments are recognized only to the extent received or receivable.

Z) AIRCRAFT LEASE PAYMENTS IN EXCESS OF OR LESS THAN RENT EXPENSE

Total aircraft operating lease rentals over the lease term are amortized to operating expense on a straight-line basis. Included in deferred charges and long-term liabilities is the difference between the straight line aircraft rent expense and the payments as stipulated under the lease agreement.

AA) ASSET RETIREMENT OBLIGATIONS

The Corporation records an asset and related liability for the costs associated with the retirement of long-lived tangible assets when a legal liability to retire such assets exists. The fair value of a liability for an asset retirement obligation is recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The associated asset retirement costs are capitalized as part of the carrying amount of the long-lived asset and then amortized over its estimated useful life. In subsequent periods, the asset retirement obligation is adjusted for the passage of time and any changes in the amount of the underlying cash flows through charges to earnings. A gain or loss may be incurred upon settlement of the liability.

BB) VARIABLE INTEREST ENTITIES

Aircraft and Engine Leasing Transactions

Air Canada has entered into aircraft and engine leasing transactions with a number of special purpose entities that are variable interest entities (a "VIE") under Accounting Guideline 15 of the CICA Handbook, Variable Interest Entities ("AcG-15"). As a result of the adoption of AcG-15 and the Corporation being the primary beneficiary of these VIEs, the Corporation consolidates leasing entities covering 51 aircraft and 22 engines.

Fuel Facilities Arrangements

Air Canada participates in fuel facilities arrangements operated through fuel facility corporations (the "Fuel Facility Corporations"), along with other airlines to contract for fuel services at various major Canadian airports. The Fuel Facility Corporations are organizations incorporated under federal or provincial business corporations acts in order to acquire, finance and lease assets used in connection with the fuelling of aircraft and ground support equipment. The Fuel Facilities Corporations operate on a cost recovery basis.

Under AcG-15, Air Canada is the primary beneficiary of three of the Fuel Facilities Corporations in Canada. Five of the Fuel Facility Corporations in which Air Canada participates in Canada that have not been consolidated have assets of approximately \$128 and debt of approximately \$108, which is Air Canada's maximum exposure to loss without taking into consideration any cost sharing and asset retirement obligations that would occur amongst the other contracting airlines. Air Canada considers this loss potential as remote.

CC) FUTURE ACCOUNTING STANDARD CHANGES

The following is an overview of accounting standard changes that the Corporation will be required to adopt in future years:

Financial Instruments and Hedges

The Accounting Standards Board has issued three new standards dealing with financial instruments: (i) Financial Instruments — Recognition and Measurement (ii) Hedges and (iii) Comprehensive Income. The key principles under these standards are that all financial instruments, including derivatives, are to be included on a company's balance sheet and measured, either at their fair values or, in limited circumstances when fair value may not be considered most relevant, at cost or amortized cost. Financial instruments intended to be held-to-maturity should be measured at amortized cost. Existing requirements for hedge accounting are extended to specify how hedge accounting should be performed. Also, a new location for recognizing certain unrealized gains and losses — other comprehensive income — has been introduced. This provides the ability for certain unrealized gains and losses arising from changes in fair value to be temporarily recorded outside the income statement but in a transparent manner. The new standards are effective for the Corporation beginning January 1, 2007. The standards do not permit restatement of prior years' financial statements however the standards have detailed transition provisions. The Corporation has evaluated the consequences of the new standards, which may have a material impact on the Corporation's financial statements. See additional disclosure on the impact of the new standards in Note 16.

DD) COMPARATIVES

Certain comparative figures have been reclassified to conform to the financial statement presentation adopted in the current year.

3. PROPERTY AND EQUIPMENT

	2006	2005
Cost		
Flight equipment	\$ 3,663	\$ 3,007
Assets under capital leases (a)	1,813	1,758
Buildings and leasehold improvements	674	649
Ground and other equipment	172	165
	6,322	5,579
Accumulated depreciation and amortization		
Flight equipment	476	184
Assets under capital leases (a)	285	142
Buildings and leasehold improvements	99	54
Ground and other equipment	40	29
• •	900	409
	5,422	5,170
Purchase deposits, including capitalized interest (b)	567	324
Property and equipment at net book value (c)	\$ 5,989	\$ 5,494

- (a) Included in capital leases as at December 31, 2006 are 37 aircraft (2005 35) with a cost of \$1,739 (2005 \$1,684) less accumulated depreciation of \$265 (2005 \$130) for a net book value of \$1,474 (2005 \$1,554), computer equipment with a cost of \$28 (2005 \$28) less accumulated depreciation of \$16 (2005 \$9) for a net book value of \$12 (2005 \$19) and facilities with a cost of \$46 (2005 \$46) less accumulated depreciation \$4 (2005 \$3) for a net book value of \$42 (2005 \$43).
- (b) Includes \$287 (2005 \$189) for Boeing B777/787 aircraft, \$66 (2005 \$65) for Embraer aircraft, \$174 (2005 \$25) for the aircraft interior refurbishment program and \$40 (2005 \$45) for equipment purchases and internal projects.
- (c) Net book value of Property and equipment includes \$1,137 (2005 \$1,224) consolidated for aircraft and engine leasing entities, and \$111 (2005 \$109) consolidated for fuel facility corporations, all of which are consolidated under AcG-15.

During 2006 the Corporation sold one of its buildings for proceeds of \$40 with a carrying value of \$35. The gain on sale of \$5 has been deferred in these consolidated financial statements as a result of the leaseback of a portion of the property by subsidiaries of the Corporation. The deferred gain will be amortized into consolidated net income on a weighted average basis over the term of the leaseback transaction, which will result in the gain being fully recognized by December 2008. The amortization of the gain recorded during 2006 of \$1 offset building lease costs included in Other operating expenses. As at December 31, 2006 the remaining deferred gain on sale of \$4 is included in Other long-term liabilities.

During 2005, the Corporation recorded provisions of \$17, including \$13 for spare parts, to reflect the excess of the carrying value over fair value.

As at December 31, 2006, flight equipment included 28 aircraft (2005 — 32), that are retired from active service with a net carrying value of \$5 (2005 — \$10), which approximates fair value.

Interest capitalized during 2006 amounted to \$61 (2005 – \$14) with \$33 at an interest rate of LIBOR plus 3.0% and \$28 at an interest rate of 8.05%.

4. DEFERRED CHARGES

	2006	2005
Aircraft lease payments in excess of rent expense	\$ 83	\$ 106
Financing costs	33	39
	\$ 116	\$ 145

5. INTANGIBLE ASSETS

	2006	2005
Indefinite life assets		
International route rights and slots	\$ 430	\$ 653
Air Canada trade name	393	595
Aeroplan trade name	75	109
Other marketing based trade names	50	118
-	948	1,475
Finite life assets

	902	1,099
Accumulated depreciation and amortization		
Aeroplan contracts	(40)	(23)
Star Alliance membership	(22)	(12)
Other contract and customer based	(90)	(40)
Technology based	(55)	(37)
	(207)	(112)
Finite life assets, net	695	987
	\$ 1,643	\$ 2,462

As a result of recognizing the benefit of future income tax assets that existed at fresh start, and for which a valuation allowance was recorded, for the year ended December 31, 2006, intangible assets were reduced on a pro-rata basis by \$733, including the impact of the reversal of the \$504 income tax valuation allowance as described in Note 8 and the reduction in future income tax assets of \$65 related to the March 2006 special distribution of Aeroplan units described in Note 20. In addition, amortization of intangible assets in 2006 amounted to \$95 (2005 - \$96).

In 2005, as a result of the dilution gain described in Note 22, intangible assets related to Aeroplan were reduced by \$77.

6. DEPOSITS AND OTHER ASSETS

	2006	2005
Aircraft related deposits and derivative instruments	\$ 172	\$ 167
Collateral under letters of credit and other deposits	133	127
Investment in US Airways (a)	9	87
Other	9	11
	\$ 323	\$ 392

(a) During 2005 the Corporation made an investment of \$87 (US\$75) in US Airways Group, Inc. ("US Airways") for 5 million shares accounted for using the cost method. In connection with the equity investment, the Corporation also received options to purchase additional common stock in US Airways. On closing of the transaction, ACE sold these options for proceeds of \$1.

During 2006 the Corporation disposed of 4.5 million shares of its holding in US Airways. The net proceeds from the sale transactions amounted to \$232 (US\$206). The Corporation recorded a pre-tax gain of \$152 (\$126 after tax) during 2006 as a result of these transactions.

As at December 31, 2006, the Corporation continued to hold 0.5 million shares in US Airways with a market value of US\$27 (\$31), representing less than 1% of the equity of US Airways.

7. LONG-TERM DEBT AND CAPITAL LEASES

	Final Maturity	Stated Interest Rate	2006	2005
ACE:	Maturity	Nate	2000	2003
Convertible senior notes (a)	2035	4.25	\$ 263	\$ 247
Air Canada:		5		
Embraer aircraft financing (b)	2017 – 2021	6.89 - 8.49	776	393
Conditional sales agreements (c)	2019	8.26 - 8.28	184	193
Lufthansa cooperation agreement (d)	2009	6.50	44	59

Term loans and credit facilities			-	14
Other	2007 - 2010	4.32 - 9.10	5	8
Direct Corporation debt			1,735	1,265
Air Canada:				
Aircraft and engine leasing entities – debt (i)			1,051	1,125
Fuel facility corporations – debt (j)			59	53
Debt consolidated under AcG-15			1,110	1,178
Air Canada:				
Capital lease obligations (k)	2008 - 2027		1,281	1,365
Total debt and capital leases			4,126	3,808
Current portion			(367)) (265)
Long-term debt and capital leases			\$ 3,759	\$ 3,543

The Stated Interest Rate in the table above is the rate as of December 31, 2006.

Principal repayment requirements as at December 31, 2006 on long-term debt and capital lease obligations, and aircraft, engine and fuel facility debt consolidated as variable interest entities under AcG-15 are as follows:

	2007	2008	2009	2010	2011	TI	nereafter
Direct Corporation debt	\$ 67	\$ 85	\$ 485	\$ 55	\$ 70	\$	973
Debt consolidated under AcG-15	120	117	60	118	248		447
Capital lease principal obligation	180	179	92	90	87		653
Total	\$ 367	\$ 381	\$ 637	\$ 263	\$ 405	\$	2,073

(a) During 2005 ACE issued \$330 of Convertible Senior Notes due 2035 ("Convertible Notes") for net proceeds of \$319. For accounting purposes, the Convertible Notes are presented as a compound instrument. At the date of issuance, the value ascribed to the holders' conversion option, which is presented as equity, was \$94 less allocated fees of \$2; the value ascribed to the financial liability was \$236. The financial liability was calculated by discounting the stream of future payments of interest and principal at the prevailing rate for a similar liability that does not have an associated conversion feature. The financial liability will increase to the face value of the debt over a five year period to June 1, 2010, the first date on which the holder can require ACE to purchase all or a portion of the Convertible Notes, as described further below, resulting in an effective interest rate of 12% on the financial liability.

The Convertible Notes bear interest at a rate of 4.25% per annum payable semi-annually in arrears on June 1 and December 1 in each year commencing December 1, 2005. Holders may convert their Convertible Notes into Class B Voting Shares (if the holder is Canadian) or into Class A Variable Voting Shares (if the holder is not a Canadian) prior to maturity based on an initial conversion rate of 20.8333 Shares per \$1,000.00 principal amount of Convertible Notes. Upon notice of conversion, ACE will have the option to deliver cash, shares or a combination of cash and shares for the Convertible Notes surrendered.

In connection with the special distribution in March 2006 of units of Aeroplan Income Fund to the shareholders of ACE (Note 20), the conversion rate has been adjusted from 20.8333 to 22.2838. This adjustment was effective on March 22, 2006 and has been determined in accordance with the terms of indenture governing the Convertible Notes. Subsequent to December 31, 2006 a further adjustment was made to the conversion factor (Note 24).

At any time on or after June 6, 2008, ACE may redeem all or a portion of the Convertible Notes at a redemption price equal to 100% of the principal amount of the Convertible Notes, plus accrued interest. Holders may require ACE to purchase all or a portion of the Convertible Notes on June 1, 2010; June 1, 2015; June 1, 2020; June 1, 2025 and June 1, 2030 at a purchase price equal to 100% of the principal amount of the Notes to be purchased, plus accrued and unpaid interest. Upon specified change of control events, holders of Convertible Notes will have the option to require ACE to purchase all or any portion of the Convertible Notes at a price equal to 100% of the principal amount of the Convertible Notes to be purchased, plus accrued and unpaid interest.

ACE may, at its option and subject to certain conditions, elect to satisfy its obligation to repay all or any portion of the principal amount of the Convertible Notes that are to be redeemed, purchased or that are to be repaid at maturity, by issuing and delivering Class A Variable Voting Shares (if the holder is not a Canadian) and Class B Voting Shares (if the holder is Canadian). The number of Shares a holder will receive in respect of each Convertible Note will be determined by dividing the principal amount of the Convertible Notes that are to be redeemed, purchased or repaid at maturity, as the case may be, and that are not paid in cash, by 95% of the average closing price (defined as the weighted average, by volume, of the reported last sale price of each class of shares) of the shares on the Toronto Stock Exchange ("TSX") for the ten consecutive trading days ending on the third trading day preceding the date fixed for redemption, purchase or maturity date, as the case may be.

(b) The following table summarizes the loans that Air Canada drew to finance the acquisition of Embraer aircraft that are secured by the delivered aircraft:

	Number of Aircraft	Interest Rate	Maturity	Original US\$ Loan Amount		-	al CDN\$ Amount
2006 Year							
Embraer 175	1	7.34%	2018	\$	20	\$	23
Embraer 190	15	8.07%	2021		330		374
2005 Year							
Embraer 175	14	7.14%	2017		277		329
Embraer 190	3	7.80%	2020		65		75
Total				\$	692	\$	801

During 2006, the interest rate margins on outstanding financing relating to all EMB 175 aircraft (US\$297) were re-priced from 3.25% down to 2.35% and eight loans that bear interest at a floating interest rate were converted to fixed interest rate loans. The Interest Rate above represents the weighted average fixed interest rates as at December 31, 2006 of the loans that Air Canada drew relating to the Embraer aircraft financing (7.81% – weighted average rate of the fixed and floating interest rate loans outstanding as at December 31, 2005).

- (c) US\$158 principal outstanding on purchases of two A340-500 aircraft financed through conditional sales agreements. Principal and interest is paid quarterly until maturity in 2019. The purchase price installments bear interest at a three month LIBOR rate plus 2.9% (8.27% as at December 31, 2006 and 7.26% as at December 31, 2005).
- (d) US\$38 principal outstanding to mature in 2009, with semi annual repayments, at a fixed interest rate of 4.495% plus an annual 2.0% guarantee fee.
- (e) US\$41 principal outstanding to mature in 2015, with quarterly repayments, at a floating interest rate equal to the six month LIBOR rate plus 5.75% pre-payable on any interest payment date after December 23, 2007 secured by certain flight training equipment with a current carrying value of \$55.
- (f) Upon closing of the initial public offering of Air Canada ("Air Canada IPO") and satisfaction of certain customary conditions, the revolving credit facility was amended and restated. The amended agreement established a \$400 million senior secured revolving credit facility (the "Amended Credit Facility") with a

three-year term. The Amended Credit Facility has a three year term that can be extended at Air Canada's option for additional one-year periods on each anniversary of the closing of the Air Canada IPO, subject to prior approval of Lenders holding no less than two thirds of the total commitments under the Amended Credit Facility. The total amount available for borrowing under the Amended Credit Facility is subject to a borrowing base restriction based on certain percentages of the values of eligible accounts receivable and eligible real estate of Air Canada. The Amended Credit Facility is secured by a first priority security interest and hypothec over the present and after-acquired personal property of Air Canada, subject to certain exclusions and permitted liens, and by a first priority charge and hypothec over certain owned and leased real property of Air Canada. Air Canada's obligations are guaranteed by 1209265 Alberta Ltd., a subsidiary of Air Canada, which provides a first priority security interest over its present and after-acquired personal property, subject to certain exclusions and permitted liens, as security for its guarantee obligations. The Amended Credit Facility contains customary representations and warranties and is subject to customary terms and conditions (including negative covenants, financial covenants and events of default). The interest rate margin ranges from LIBOR plus 2.25% to 3.25% or prime plus 1.25% to 2.25% (based on Air Canada's earnings before interest, taxes, depreciation, amortization and obsolescence and aircraft rent). As at December 31, 2006, no amount was drawn under this facility.

(g) Aeroplan has arranged for senior secured credit facilities in the amount of \$475. The credit facilities consist of one \$300 (or the U.S. dollar equivalent thereof) term facility (the "Term Facility"), a \$100 (or the U.S. dollar equivalent thereof) acquisition facility (the "Acquisition Facility") and a \$75 (or the U.S. dollar equivalent thereof) revolving term facility (the "Revolving Term Facility").

The Term Facility and the Acquisition Facility mature on June 29, 2009, or earlier at the option of Aeroplan and bear interest at rates ranging from Canadian prime rate and U.S. base rate to Canadian prime rate and U.S. base rate plus 0.75% and the Bankers' Acceptance rate and LIBOR plus 1.0% to 1.75%. At December 31, 2006, borrowings under the Term Facility were in the form of Bankers' Acceptances with a 90 day term (2005 – 91 day term) and an effective interest rate of 5.3% (2005 – 4.4%). The Term Facility was drawn in order to fund a portion of the \$400 Aeroplan Miles Redemption Reserve, included in Cash and cash equivalents and Short-term investments. The remaining \$100 was funded from the proceeds of the Aeroplan offering described in Note 22. During the year, the term of the Revolving Term Facility was extended to mature on June 29, 2009, from June 29, 2008, or earlier at the option of Aeroplan. As at December 31, 2006, no amounts were drawn under the Acquisition Facility (2005 – nil).

Borrowings under the Aeroplan credit facilities are secured by substantially all the present and future assets of Aeroplan, subject to a merchant services agreement with First Data Loan Company, Canada that includes a guarantee to fulfill obligations related to airline and tour tickets sold in advance and charged to the credit cards processed under the agreement. As at December 31, 2006, the maximum exposure related to this guarantee was estimated to be \$215 and would rank ahead of the security granted under the credit facilities, which is included in the Advance ticket sales liability.

The terms of the New Credit Facilities include certain covenants. The continued availability of the credit facilities are subject to Aeroplan's ability to maintain certain leverage, debt service and interest coverage covenants, as well as other affirmative and negative covenants.

(h) In connection with the initial public offering of the Jazz Air Income Fund ("Jazz IPO"), Jazz arranged for a senior secured syndicated credit facility in the amount of \$150 (Note 19). On closing of the Jazz IPO, \$115 was drawn under the credit facility (\$113 net of fees). The facility bears interest at floating rates and has a three year term maturing in 2009. The outstanding credit facility is secured by substantially all the present and future assets of Jazz. Jazz entered into swap agreements with third parties with a notional value of \$115 to receive floating rates and pay fixed rates of 7.09%. Subsequent to December 31, 2006, the original term of this facility was extended to 2010.

(i) Air Canada has entered into aircraft and engine lease transactions with several special purpose entities that qualify as VIEs. The debt has a weighted average effective interest rate of approximately 8%. The aircraft are charged as collateral against the debt by the owners thereof. The creditors under these leasing arrangements have recourse to the Corporation, as lessee, in the event of default or early termination of the lease. Aircraft related debt amounting to US\$902 (\$1,051) [2005 — US\$965 (\$1,125)] is summarized as follows:

	Final		
	Maturity	2006	2005
Canadian Regional Jet	2007 – 2011	\$ 316	\$ 329
Boeing 767-300	2011 – 2016	211	231
Engines	2008	71	78
Airbus 319	2011 – 2014	304	331
Airbus 321	2017	149	156
		\$ 1,051	\$ 1,125

- (j) Under AcG-15, Air Canada is the primary beneficiary of certain of the Fuel Facility Corporations in Canada. The debt is secured by a general security agreement covering all assets of the Fuel Facility Corporations.
- (k) Capital lease obligations, related to computer equipment, facilities and 37 aircraft, total \$1,281 (\$80 and US\$1,030) [2005 total \$1,365 (\$87 and US\$1,096)]. The debt has a weighted average effective interest rate of approximately 8% and final maturities range from 2008 to 2027. During 2006 the Corporation recorded interest expense on capital lease obligations of \$101 (2005 \$119).

As at December 31, 2006, obligations under capital leases for future minimum lease payments are as follows:

2007	\$ 275
2008	260
2009	161
2010	152
2011	142
Thereafter	829
Total minimum lease payments	1,819
Less amount representing interest	(538)
Total obligation under capital leases	\$ 1,281

Certain aircraft lease agreements contain a fair value test, beginning on July 1, 2009, and annually thereafter until lease expiry. This test relates to 38 aircraft under lease of which 37 are accounted for as capital leases. Under the test, the Corporation may be required to prepay certain lease amounts, based on aircraft fair values, as of the date of the test. Any amounts prepaid are recoverable to the extent that aircraft fair values exceed certain thresholds and to the extent the Corporation has obtained residual value support on lease expiry. The maximum amount payable on July 1, 2009, assuming the related aircraft are worth nil, is US\$871. This amount declines over time to nil upon lease expiry.

Interest paid on long-term debt and capital lease obligations in 2006 by the Corporation was \$273 (2005 – \$220).

8. FUTURE INCOME TAXES

The following income tax related amounts appear in ACE's consolidated statement of financial position:

	2006	2005
Future income tax asset recorded in current assets (a) and (b)	\$ 584	\$ -
Future income tax asset (b)	\$ 336	\$ -
Current taxes payable (a)	\$ (345)	\$ -
Future income tax liability (c)	\$ (136)	\$ (221)

a) Current Taxes

As part of a tax loss utilization strategy that was planned in conjunction with the initial public offering of Air Canada and corporate restructuring, a current tax payable of \$345 was created. This tax payable arose upon a transaction to transfer tax assets from Air Canada to ACE. This tax payable will be recoverable from future income tax assets of Air Canada, and as such a future income tax asset of \$345 has been recorded in current assets. The recovery is expected to settle within twelve months.

b) Valuation Allowance

The Corporation has determined that it is more likely than not that certain future income tax assets of \$575, of which an amount of \$504 was offset by a valuation allowance, will be realized through a combination of future reversals of temporary differences and taxable income. As a result a future income tax asset of \$575 is recorded on the consolidated statement of financial position, with \$239 classified as a current future income tax asset based upon the expected period of reversal. The plan of arrangement as described in Note 24 provides part of the basis for management's assessment of realization due to the use of future income tax assets involved in the distribution of Aeroplan units.

With the reversal of the valuation allowance, a reduction to intangible assets (on a pro-rata basis) of \$504 was recorded based on the current carrying value of future income tax assets that existed at fresh start, \$16 was recorded as a recovery of income tax in the consolidated statement of operations for those future income tax assets arising after fresh start, \$12 was recorded as a recovery of income tax for the current year, and \$43 has been recorded as a deferred tax recovery related to the increase in the effective tax rate applicable to certain of the Corporation's future income tax assets. This deferred recovery is recorded in Accounts payable and accrued liabilities and will reverse to income as the underlying future income tax assets are realized. The Corporation has determined that it is more likely than not that future income tax assets of \$1,511 are not recoverable and continue to be offset by a valuation allowance. However, the future tax deductions underlying the future tax assets remain available for use in the future to reduce taxable income.

c) Future Income Tax Liability

It has been assumed that certain intangibles and other assets with no underlying tax cost and a carrying value of approximately \$861, have indefinite lives and accordingly, the associated future income tax liability of \$136 is not expected to reverse until the assets are disposed of or become amortizable, resulting in the reporting of a future income tax liability of \$136.

	D	ecember 31 2006	Dece	mber 31 2005
Future tax assets				
Non-capital loss carry forward	\$	413	\$	793
Post-employment obligations		685		805
Accounting provisions not currently deductible for tax		181		182
Tax basis of capital over book basis		309		400
Outside basis differences in ACE's investments in Aeroplan		359		-
Eligible capital expenditures		28		19
Unearned revenues		393		31
Intangible assets		102		111
Net other		45		64
Total future tax assets		2,515		2,405
Future tax liabilities				
Intangible assets		220		388
Net future tax assets		2,295		2,017
Less valuation allowance		1,511		2,238
Net recorded future income tax asset (liability)	\$	784	\$	(221)

The reconciliation of income tax attributable to continuing operations, computed at the statutory tax rates, to income tax expense is as follows:

	December 31 2006	December 31 2005
Provision based on combined federal and provincial rates	\$ 184	\$ 132
Non-taxable portion of capital gains	(24)	(2)
Large corporations tax	-	15
Non-deductible expenses	35	25
Taxable capital gain on Aeroplan and Jazz distributions to ACE	17	-
Non-taxable dilution gain on Aeroplan LP	-	(42)
Non-taxable dilution gain on Jazz LP	(63)	-
Non-taxable dilution gain on Air Canada	(4)	-
Effect of tax rate changes on future income taxes	(28)	-
Effect of statutory tax rates substantially enacted during the year	82	(38)
Reduction in income tax expense arising from the recognition of a previously		
unrecognized tax loss	(16)	-
Other	8	1
	191	91
Valuation allowance (refer to b) above)	(82)	40
Provision for income taxes	\$ 109	\$ 131

Significant components of the provision for income taxes attributable to continuing operations are as follows:

	December 31 2006	December 31 2005
Current tax expense	\$ 7	\$ 15
Future income tax expense (recovery) relating to temporary differences	118	114
Future income tax expense (recovery) from tax rate changes	82	(38)
Reduction in income tax expense arising from the recognition of a previously		
unrecognized tax loss	(16)	-
Valuation allowance	(82)	40
Provision for income taxes	\$ 109	\$ 131

In addition to the above items impacting the provision for income taxes, a future income tax expense of \$59 was recorded in equity related to the ACE Special Distribution of Aeroplan Units (refer to Note 20).

Taxes paid in 2006 by the Corporation were \$1 (2005 - nil).

The balances of tax attributes as at December 31, 2006, namely the balances of non-capital loss carry forwards, vary amongst different taxing jurisdictions. The following are the Federal tax loss expiry dates:

	Tax losses
2010	\$ 9
2014	20
2015	896
2026	388
	\$ 1,313

9. PENSION AND OTHER BENEFIT LIABILITIES

Air Canada maintains several defined benefit and defined contribution plans providing pension, other retirement and post-employment benefits to its employees and also to certain employees assigned to work at Aeroplan and ACTS.

Air Canada is the administrator and sponsoring employer of ten Domestic Registered Plans ("Domestic Registered Plans") under the Pension Benefits Standard Act, 1985 (Canada). The US plan, UK plan and Japan plan are international plans covering employees in those countries. In addition, Air Canada maintains a number of supplementary pension plans, which are not registered. The defined benefit pension plans provide benefits upon retirement, termination or death based on the member's years of service and final average earnings for a specified period.

Jazz also maintains its own defined benefit and defined contribution plans, providing pension benefits to most of its employees.

The other employee benefits consist of health, life and disability. These benefits consist of both post-employment and post-retirement benefits. The post-employment benefits relate to disability benefits available to eligible active employees, while the post-retirement benefits are comprised of health care and life insurance benefits available to eligible retired employees.

In 2005, the measurement date used for financial reporting of the pension and other benefit obligations was revised to November 30 from December 31.

Benefit Obligation and Plan Assets

The following tables present financial information related to the change in the pension and other postemployment benefits plans:

	Pension	Benefits	Other Employe	e Future Benefits
	2006	2005	2006	2005
Change in benefit obligation				
Benefit obligation at beginning of year	\$ 12,921	\$ 11,207	\$ 940	\$ 842
Current service cost	254	202	77	85
Interest cost	640	650	48	50
Employees' contributions	89	80	-	-
Benefits paid	(627)	(592)	(60)	(63)
Actuarial (gain) loss	(74)	1,419	(38)	31
Foreign exchange	32	(45)	(1)	(5)
	13,235	12,921	966	940
Change in plan assets				
Fair value of plan assets at				
beginning of year	10,421	9,673	14	10
Actual return on plan assets	1,493	1,016	1	1
Employer contributions	455	284	47	54
Employees' contributions	89	80	-	-
Benefits paid	(627)	(592)	(54)	(51)
Foreign exchange	27	(40)	-	-
	11,858	10,421	8	14
Deficit at end of year	1,377	2,500	958	926
Employer contributions after				
measurement date	(7)	(6)	(6)	(5)
Unrecognized past service cost	-	-		-
Unrecognized net actuarial gain (loss)	(221)	(1,061)	46	21
Net benefit obligation	1,149	1,433	998	942
Weighted average assumptions used to				
determine the accrued benefit liability				
Discount rate	5.00%	5.00%	5.00 - 5.50%	4.50 - 5.75%
Rate of compensation increase (a)	2.50%	4.00%		

⁽a) As a result of pay awards during 2006, a rate of compensation increase of 1.75% was used for years 2006 to 2008 in determining the net benefit obligation for the pension plan and 2.5% for the remaining years.

The pension benefit deficit at the end of the year by plan is as follows:

	2006	2005
Domestic registered plans	\$ 556	\$ 1,657
US, UK and Japan	55	76
Supplementary plans	766	767
	\$ 1,377	\$ 2,500

The deficit, on an accounting basis, at December 31, 2006 for pension benefits was \$1,377 compared to \$2,500 at December 31, 2005. The decrease in the accounting deficit is mainly the result of a return on plan assets of approximately 13.8% for the year and funding of past service employer contributions of \$261. The decrease in the net plan deficit during the year is expected to result in decreased employer contributions for 2007 as described below under Pension Plan Cash Funding Obligations.

The net benefit obligation is recorded in the statement of financial position as follows:

	2006	2005
Pension benefits	\$ 1,149	\$ 1,433
Other employee future benefits	998	942
Net benefit obligation	2,147	2,375
Current portion	(271)	(221)
Pension and other benefits liability	\$ 1,876	\$ 2,154

The current portion of Pension benefits represents past service contributions for the Domestic Registered Plans, scheduled to be paid during 2007 while the current portion of Other employee future benefits is an estimate of the claims to be incurred during 2007. The current portion is included in Accounts payable and accrued liabilities.

Total cash payments for 2006, consisting of cash contributed by the Corporation to its defined benefit plans, cash payments to beneficiaries for post-employment and post-retirement plans, and cash contributed to its defined contribution plans were \$520 (2005 – \$355).

Pension and Other Employee Future Benefit Expense

The Corporation has recorded net defined benefit pension and other employee future benefits expense as follows:

	Pension Benefits				Other Employee Future Benefits			
		2006		2005	2006	2005		
Components of								
Net Periodic Pension Cost								
Current service cost	\$	254	\$	202	\$ 77	\$ 85		
Interest cost		640		650	48	50		
Actual return on plan assets		(1,515)		(973)	(1)	(1)		
Actuarial (gain) loss on benefit obligation		(47)		1,362	(43)	19		
Costs arising in the year		(668)		1,241	81	153		
Differences between costs arising in the								
year and costs recognized in the year in								
respect of:								
Return on plan assets		774		281	-	-		
Actuarial loss (gain)		65		(1,362)	26	(23)		
		839		(1,081)	26	(23)		
Net defined benefit pension and other								
employee benefits expense	\$	171	\$	160	\$ 107	\$ 130		
Weighted average assumptions used to								
determine the accrued benefit cost								
Discount rate		5.00%		5.75%	5.00 - 5.50%	4.50 - 5.75%		
Expected long-term rate of return								
on plan assets		7.50%		7.50%	7.50%	7.50%		
Rate of compensation increase (a)		4.00%		4.00%				

⁽a) A rate of compensation increase of 0% in 2005 and 2% in 2006 was used in determining the net benefit pension expense and 4% for the remaining years.

Other Benefits — Sensitivity Analysis

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A 9.75% annual rate of increase in the per capita cost of covered health care benefits was assumed for 2006 (2005 – 10%). The rate is assumed to decrease gradually to 5% by 2013. A one percentage point increase in assumed health care trend rates would have increased the service and interest costs by \$1 and the obligation by \$17. A one percentage point decrease in assumed health care trend rates would have decreased the service and interest costs by \$1 and the obligation by \$16.

Pension Plan Cash Funding Obligations

As at December 31, 2006 and based on the January 1, 2006 solvency valuation, the table below provides projections for the Corporation's cash pension plan funding obligations for 2007. The final funding obligation for 2007 will be determined based on the January 1, 2007 valuation.

	2007
Past service domestic registered plans	\$ 250
Current service domestic registered plans	162
Other pension arrangements	86
	\$ 498

The most recent actuarial valuation is as at January 1, 2006 and the effective date of the next required actuarial valuation is January 1, 2007. For domestic registered pension plans, the funding requirements are based on the minimum past service contributions disclosed in the January 1, 2006 actuarial valuations plus a projection of the current service contributions based upon the January 1, 2006 actuarial valuation used for the purpose. Based on a funding outlook, the solvency deficit on the registered pension plans at January 1, 2007 is expected to decrease significantly compared January 1, 2006 and, as a result, employer contributions determined in accordance with regulations, are expected to decline by approximately \$90 in 2007.

On August 9, 2004, the Government of Canada adopted the Air Canada Pension Plan Solvency Deficiency Funding Regulations (the "Pension Regulations"). The Pension Regulations allow Air Canada to fund the solvency deficiencies in its Domestic Registered Plans as of January 1, 2004 over ten years, rather than the five years required under the ordinary rules, and to pay down such deficiencies by way of an agreed schedule of variable annual contributions rather than by way of equal annual contributions as required under the ordinary rules. The Pension Regulations came into force upon Air Canada's emergence from CCAA protection on September 30, 2004, on which date Air Canada issued subordinated secured promissory Notes in an aggregate amount of approximately \$347 in favour of the pension plan trustee. Such Notes will be reduced as the principal amount of the solvency deficiencies is paid down, and will only be called on the occurrence of certain specified events of default. The amount of secured promissory Notes outstanding as at December 31, 2006 is \$219 (2005 – \$329. The effect of the issuance of the subordinated security promissory Notes is included within the fair value of the obligation for pension benefits as reflected in the Corporation's balance sheet.

The composition of the Domestic Registered Plan assets and the target allocation consist of the following:

	November 30	November 30	Target
	2006	2005	Allocation
Equity securities	59.1%	62.3%	59.0%
Bonds and mortgages	34.7%	32.1%	41.0%
Real estate	0.0%	0.1%	0.0%
Short-term and other	6.2%	5.5%	0.0%
	100.0%	100.0%	100.0%

Domestic Registered Plans

For the Domestic Registered Plans, the investments conform to the Statement of Investment Policy and Objectives of the Air Canada Pension Master Trust Fund. The investment return objective of the fund is to achieve a total annualized rate of return that exceeds inflation by at least 3.75% over the long term.

In addition to the broad asset allocation, as summarized in the asset allocation section above, the following policies apply to individual asset classes:

- Equity investments can include convertible securities, and are required to be diversified among industries and economic sectors. Foreign equities can comprise 37% to 43% of the total market value of the trust. Limitations are placed on the overall allocation to any individual security at both cost and market value. Derivatives are permitted to the extent they are not used for speculative purposes or to create leverage.
- Fixed income investments are oriented toward risk averse, long term, investment grade securities rated "A" or higher. With the exception of Government of Canada securities or a province thereof, in which the plan may invest the entire fixed income allocation, fixed income investments are required to be diversified

among individual securities and sectors. The target return is comprised of 40% of the total return of the Scotia Capital Universe Bond Index and 60% of the total return of the Scotia Capital Long Term Bond Index.

Similar investment policies are established for the other pension plans sponsored by the Corporation.

The Corporation's expected long-term rate of return on assets assumption is selected based on the facts and circumstances that exist as of the measurement date, and the specific portfolio mix of plan assets. Management reviewed anticipated future long-term performance of individual asset categories and considered the asset allocation strategy adopted by the Corporation, including the longer duration in its bond portfolio in comparison to other pension plans. These factors are used to determine the average rate of expected return on the funds invested to provide for the pension plan benefits. While the review considers recent fund performance and historical returns, the assumption is primarily a long-term, prospective rate.

Defined Contribution Plans

The Corporation's management, administrative and certain unionized employees may participate in defined contribution plans. The employees' contributions range from 3% to 6% of earnings with the Corporation contributing an equal amount. The Corporation's expense for defined contribution plans amounted to \$7 for the year ended December 31, 2006 (2005 – \$6).

10. OTHER LONG-TERM LIABILITIES

	2006	2005
Unfavourable contract liability on aircraft leases (a)	\$ 77	\$ 107
Aircraft rent in excess of lease payments	121	126
Long-term employee liabilities (b)	54	109
Workplace safety and insurance board liability	45	53
Other	81	51
	\$ 378	\$ 446

- (a) The unfavourable contract liability on aircraft leases represents the net present value of lease payments in excess of estimated market rents related to lease arrangements that existed on fresh start reporting.
- (b) The following table outlines the changes to labour related provisions which are included in long-term employee liabilities for balances that existed upon the implementation of fresh start reporting on September 30, 2004 (current portion included in Accounts payable and accrued liabilities):

	2006	2005
Beginning of year	\$ 144	\$ 180
Charges recorded in salaries, wages and benefits	-	5
Interest accretion	8	12
Adjustment (see below)	(23)	-
Amounts disbursed	(52)	(53)
End of year	77	144
Current portion	(32)	(40)
	\$ 45	\$ 104

During 2006, as a result of a review of the outstanding provisions related to programs implemented prior to September 30, 2004, it was determined that a portion of the provision amounting to \$23 would no longer be required and was adjusted. The amount reversed has been applied as an adjustment to shareholders' equity as described in Note 12.

The following table outlines the changes to labour related provisions which are included in long-term employee liabilities for balances that have been created subsequent to the implementation of fresh start reporting on September 30, 2004 (current portion included in Accounts payable and accrued liabilities):

	2006	2005
Beginning of year	\$ 13	\$ 12
Special charge for labour restructuring:		
Initial provision	33	-
Adjustment to provision	(8)	-
Charges recorded in salaries, wages and benefits	7	5
Amounts disbursed	(13)	(4)
End of year	32	13
Current portion	(23)	(8)
	\$ 9	\$ 5

The Corporation offers certain severance programs to certain employees from time to time. The cost of these programs is recorded within operating expenses. The Corporation does not have any continuing obligation to offer these programs.

Special charge for labour restructuring

A workforce reduction plan was announced in February 2006 to reduce non-unionized employee levels by 20 percent. A special charge of \$28 was recorded in the Air Canada Services segment and \$5 in ACTS in Quarter 1 2006 relating to this program. During Quarter 4 2006, the estimated cost of this plan to the Air Canada Services segment was revised due to the favourable impact of attrition and other factors which

reduced the cost of achieving the target. As a result, the Air Canada Services segment recorded a reduction of \$8 in Quarter 4 2006 to the special charge for labour restructuring.

11. STOCK-BASED COMPENSATION

ACE Stock Option Plan

Certain of the Corporation's employees participate in the ACE stock option plan. Plan participation is limited to employees holding positions that, in ACE Board's view (or a committee selected by the Board), have a significant impact on ACE's long term results. The stock option plan provides that the options will have an exercise price of not less than 100% of the market price of the underlying shares at the time of grant. Fifty percent of all options vest over four years. The remaining options vest upon performance conditions that are based on net income targets established by the ACE Board over the same time period. All options expire after seven years. The terms of ACE's stock option plan specify that upon the retirement of the employee, options granted to that employee may be exercised as the options vest.

The number of ACE stock options granted to employees, the related compensation expense recorded (post adoption of EIC-162) and the assumptions used to determine stock-based compensation expense, using the Black-Scholes option valuation model were as follows:

		2006		2005
Compensation expense (\$ millions)	\$	7	\$	3
Number of stock options granted Weighted average fair value per option granted (\$) Aggregated fair value of options granted (\$ millions) Weighted average assumptions:	\$ \$	748,926 10.61 8	\$ \$	770,000 9.46 7
Risk-free interest rate Expected volatility		4.02% 35%		3.40% 35%
Dividend yield Expected option life (years)		0% 4.5		0% 4.5

The risk-free interest rate above is based on the average yield on the Government of Canada marketable bonds for the contractual life of the option in effect at the time of the grant. Expected volatilities used are based on historical volatilities from traded stock of ACE and other factors. A zero dividend yield is used based on the historical dividend yield of ACE. The expected life of the stock options represent the period of time that options granted are expected to be outstanding and is derived from the output of an option valuation model.

In 2006, the amount credited to share capital for ACE stock options exercised was \$16 (2005 – \$11). For ACE stock options exercised, new shares are issued by the Corporation.

At December 31, 2006, a total of 3,597,798 (2005-3,186,908) stock options were outstanding, and represented approximately 2.9% (2005-2.61%) of ACE's fully diluted equity, which was within the Corporation's guideline of 5%.

A summary of the activity related to Corporation employees participating in the ACE stock options' plan is as follows:

	2006			2005		
	Options (000)		ghted Average se Price/Share	Options (000)		ed Average Price/Share
Beginning of year	3,187	\$	24.70	3,028	\$	20.00
Granted	134		37.65	770		39.44
Exercised	(111)		20.00	(522)		20.00
Forfeited	(79)		20.00	(89)		20.00
Outstanding options, prior to special distribution	3,131		25.53	3,187		24.70
Adjustment – ACE special distribution (a)	218			n/a		
Outstanding options, after special distribution (a)	3,349		23.87			
Granted	615		33.33			
Exercised	(338)		18.80			
Forfeited	(28)		21.85			
Outstanding options, end of year	3,598	\$	25.98	3,187	\$	24.70
Options exercisable, end of year	613	\$	24.50	162	\$	23.95

(a) In accordance with the terms of the ACE stock option plan, the special distribution in March 2006 (Note 20) triggered an adjustment to the weighted average exercise price and the number of options outstanding. Effective March 22, 2006, the adjustment was applied to all unexercised ACE stock options as of March 1, 2006, whether vested or not, in a consistent manner with the adjustment to the conversion rate for the convertible senior notes described in Note 7. As at the adjustment date, the weighted average option exercise price and number of options outstanding had been amended from \$25.53 and 3,131,399 options to \$23.87 and 3,349,608 options.

The total intrinsic value of options exercised under this plan during 2006 was \$7.

		2006 Outstanding Options			2006 Exer	cisable Options
Range of Exercise Prices	Expiry Dates	Number of Options Outstanding	Weighted Average Remaining Life (Years)	Weighted Average Exercise Price/Share	Number of Exercisable Options	Weighted Average Exercise Price/Share
\$18.70	2011	2,025,074	5	\$18.70	419,130	\$18.70
\$31.89 - \$38.91	2012	820,936	6	36.89	193,867	37.05
\$30.61 - \$36.11	2013	751,788	7	33.70	-	-
		3,597,798		\$25.98	612,997	\$24.50

		2005 Outstanding Options			2005 Exer	cisable Options
Range of Exercise Prices	Expiry Dates	Number of Options Outstanding	Weighted Average Remaining Life (Years)	Weighted Average Exercise Price/Share	Number of Exercisable Options	Weighted Average Exercise Price/Share
\$20.00	2011	2,416,908	6	\$20.00	129,923	\$20.00
\$34.11 - \$41.62	2012	770,000	7	39.44	32,292	39.87
		3,186,908		\$24.70	162,215	\$23.95

The aggregate intrinsic value of the exercisable options outstanding at December 31, 2006 is \$8 and the weighted average remaining life is 5.3 years.

Subsequent to December 31, 2006, a further adjustment was made to the weighted average exercise price and the number of options outstanding (see Note 24).

Air Canada Long-Term Incentive Plan

Certain of the Air Canada's employees participate in the Air Canada Long-term Incentive Plan (the "Air Canada LTIP") administered by the Board of Directors of Air Canada. The Air Canada LTIP which was established at the

time of the Air Canada IPO in November 2006 provides for the grant of options and performance share units to senior management and officers of Air Canada.

The options to purchase shares granted under the Air Canada LTIP have a maximum term of 10 years and an exercise price based on the fair market value of the shares at the time of the grant of the options. Options granted under the Air Canada LTIP will vest over four years and will incorporate performance vesting features. The performance vesting conditions are based on net income targets established by the Air Canada Board over the same time period. The terms of the Air Canada LTIP specify that upon the retirement of the employee, options granted may be exercised as the rights to exercise accrue within three years from the retirement date.

The number of Air Canada stock options granted to employees, the related compensation expense recorded and the assumptions used to determine stock-based compensation expense, using the Black-Scholes option valuation model were as follows:

	2006	2005
Compensation expense (\$ millions)	\$ 3	\$ -
Number of stock options granted	1,699,678	-
Weighted average fair value per option granted (\$)	\$ 5.40	\$ -
Aggregated fair value of options granted (\$ millions)	\$ 9	\$ -
Weighted average assumptions:		
Risk-free interest rate	4.07%	-
Expected volatility	35%	-
Dividend yield	0%	-
Expected option life (years)	4.5	-

The risk-free interest rate above is based on the average yield on the Government of Canada marketable bonds for the contractual life of the option in effect at the time of the grant. Expected volatilities used are based on historical volatilities from traded stock of Air Canada and other factors. A zero dividend yield is used based on the historical dividend yield of Air Canada. The expected life of the stock options represent the period of time that options granted are expected to be outstanding and is derived from the output of an option valuation model.

A summary of the activity related to Corporation employees participating in the Air Canada Long-term Incentive Plan is as follows:

	2006			2005			
	Options (000)	Ŭ	ted Average Exercise ice/Share (b)	Options (000)	Weighted Exercise Pr	I Average ice/Share	
Beginning of year	-	\$	-	-	\$	-	
Granted	1,700		21.00	-		-	
Exercised	-		-	-		-	
Forfeited	-		-	-		-	
Outstanding options, end of year	1,700	\$	21.00	-	\$	-	
Options exercisable, end of year	-	\$	-	-	\$	-	

		2006 Outstanding Options			2006 Exer	cisable Options
		Number of	Weighted Average	Weighted Average	Number of	Weighted Average
Range of	Expiry	Options	Remaining Life	Exercise	Exercisable	Exercise
Exercise Prices	Dates	Outstanding	(Years)	Price/Share	Options	Price/Share
\$21.00	2016	1,699,678	10	\$21.00	-	-

Approximately 346,000 performance share units were also granted under the Air Canada LTIP. The performance share units have a maximum term of three years and a grant price based on fair market value of the shares at the time of the grant. Performance share units granted under the Long-term Incentive Plan will vest over three years commencing January 1, 2007 and will incorporate performance vesting features. The terms of the Long-term Incentive Plan specify that upon the retirement of the employee, performance share

units granted will be prorated at the end of the vested term based on the total number of completed months of active service during the term of the performance share units.

Aeroplan Long-Term Incentive Plans

Aeroplan has an Initial Long-Term Incentive Plan ("Aeroplan Initial LTIP") that grants Aeroplan Fund Units to key employees. On March 31, 2006, ACE transferred 500,000 Aeroplan Fund Units for the purpose of funding the Aeroplan Initial LTIP. Under the terms of the plan, 50% of the units granted are subject to vesting conditions based on Aeroplan's performance and 50% vest based on time. Performance based units vest at the end of each performance period if distributable cash targets established by the Aeroplan Board of Directors for each of the periods ended December 31, 2005, 2006 and 2007 are met, or on a cumulative basis at the end of the following performance period if such targets are met in the following performance period.

On March 31, 2006 ACE exchanged on a 1:1 basis 500,000 of its Aeroplan Limited Partnership units into Aeroplan Income Fund units ("Fund Units"). The Aeroplan Income Fund units were transferred to a trust for the purpose of funding the Aeroplan Initial LTIP. The transfer was recorded at the carrying amount of the net assets transferred and does not give rise to a gain or loss within ACE. Forfeited units that do not meet the vesting conditions and accumulated distributions thereon accrue back to ACE.

Aeroplan has an On-going Long-Term Incentive Plan ("Aeroplan On-going LTIP") that grants yearly Aeroplan Fund Units to eligible employees on a basis of a percentage of their annual base salary. The Aeroplan Fund Units are held in a trust for the benefit of the eligible employees and vest at the end of a three year period commencing January 1 of the year in respect of which they are granted, subject to achieving distributable cash targets established by the Aeroplan Board of Directors. Aeroplan purchases the units on the secondary market. Distributions declared by Aeroplan on any units granted under this plan may be invested in additional units, which will vest concurrently and proportionately with the units granted. Forfeited units and accumulated distributions thereon accrue to Aeroplan. The trust is consolidated by Aeroplan as a variable interest entity.

Aeroplan has an Omnibus Plan in order to attract and/or retain employees. The Aeroplan Fund Units are held in a trust and vesting conditions vary at the time of grant but are typically time based, with units vesting 3 years after the grant. Distributions declared by Aeroplan on any units granted under this plan may be invested in additional units, which will vest concurrently with the units granted. Forfeited units and accumulated distributions thereon accrue to Aeroplan. The trust is consolidated by Aeroplan as a variable interest entity.

As at December 31, 2006, the details of units of Aeroplan Long-term Incentive Plans described above are as follows:

Aeroplan Fund Units (000)	Initial LTIP	On-going LTIP	Omnibus Plan
Beginning of year, units outstanding	-		-
Granted	568	86	66
Forfeited	(103)	-	-
Vested	(197)	-	-
End of year, units outstanding	268	86	66
Weighted average remaining life (years)	1.3	2	2.5
Cost of units purchased during the year	\$ -	\$ 1	\$ 1

The Aeroplan segment recorded compensation expense of \$3 during 2006 for the above plans.

Jazz Long-Term Incentive Plan

Jazz has a similar Initial Long-Term Incentive Plan ("Jazz Initial LTIP") that grants Jazz Fund Units to key employees as a one-time special award. A total of 603,903 Jazz Fund Units were granted. Under the terms of the plan, 50% of the units granted are subject to vesting conditions based on Jazz's performance and 50% vest on December 31, 2008. The Jazz segment recorded compensation expense of \$2 during 2006 for this plan and the total estimated future commitment under this plan is \$6.

During 2006, the net amount credited to contributed surplus for the stock-based compensation plans of the Corporation was \$19 (2005 - \$2).

Employee Ownership Plans

Employee ownership plans have been established for shares or units of ACE, Air Canada, Aeroplan or Jazz under which eligible employees are allowed to invest a portion of their base salary for the purchase of shares or units on the secondary market (up to 6% of their salary for Jazz employees and up to 5% for other entities). The Corporation will match between 33% and 100% of the investments made by the employee. During 2006, the Corporation recorded compensation expense of \$2 in the Air Canada Services segment, less than \$1 in the Aeroplan segment and \$2 in the Jazz segment for these employee ownership plans.

12. SHAREHOLDERS' EQUITY

The issued and outstanding common shares of ACE as at December 31, 2006, along with potential common shares, are as follows:

Outstanding shares (000)	2006	2005
Outstanding shares (000) Issued and outstanding	2000	2003
Class A variable voting shares (a)	79,499	76,735
Class B voting shares (a)	_ ′ _	,
	22,772	25,059
Shares held in escrow	-	28
Total issued and outstanding	102,271	101,822
Potential common shares		
Convertible preference shares (b)	10,747	10,228
Convertible notes (c)	7,354	6,875
Stock options	3,598	3,187
Total potential common shares	21,699	20,290

Share capital as at December 31, 2006 (net of issue costs):

	2006	2005
Share capital		
Common shares (a)	\$ 2,188	\$ 2,231
Convertible preference shares (b)	117	117
Convertible notes (c)	92	92
· ·	2,397	2,440
Adjustment to shareholders' equity (d)	(1,655)	(1,693)
	\$ 742	\$ 747

During 2006 the Corporation, issued 449,109 (2005 – 521,976) common shares on the exercise of stock options for cash consideration of \$8 (2005 – \$10). In addition, as a result of the special distribution in March 2006 (Note 20), \$59 was recorded as a reduction in Share capital.

In 2005, ACE completed the public offering of an aggregate of 12,485,000 Class A Variable Voting Shares and Class B Voting Shares at a price of \$37.00 per share for gross proceeds of approximately \$462 (\$442 net of fees).

Share capital and other equity is comprised of:

(a) Common shares

Class A Variable Voting Shares

The Class A Variable Voting Shares may be held only by persons who are not Canadians and are entitled to one vote per Class A Variable Voting Share unless (i) the number of Class A Variable Voting Shares outstanding (including the Convertible Preferred Shares, on an as-converted basis), as a percentage of the total number of votes attaching to voting shares outstanding exceeds 25% or (ii) the total number of votes cast by or on behalf of holders of Class A Variable Voting Shares (including the Convertible Preferred Shares on an as-converted basis) at any meeting exceeds 25% of the total number of votes that may be cast at such meeting. If either of the above noted thresholds would otherwise be surpassed at any time, the vote attached to each Class A Variable Voting Share will decrease proportionately such that (i) the Class A Variable Voting Shares as a class (including the Convertible Preferred Shares on an as-converted basis) do not carry more than 25% of the aggregate votes attached to all issued and outstanding voting shares of ACE and (ii) the total number of votes cast by or on behalf of holders of Class A Variable Voting Shares (including the Convertible Preferred Shares on an as-converted basis) at any meeting do not exceed 25% of the votes that may be cast at such meeting.

Class B Voting Shares

The Class B Voting Shares may be held only by persons who are Canadians. Each Class B Voting Share shall confer the right to one (1) vote in person or by proxy at all meetings of shareholders of the ACE.

The changes during 2006 in the outstanding common shares and their aggregate stated value were as follows:

		2006
	Number (000)	Amount
Issued, beginning of year	101,822	\$ 2,231
Shares issued on the exercise of stock options	449	16
Special distribution	-	(59)
	102,271	\$ 2,188

(b) Convertible Preferred Shares

As at September 30, 2004, 12,500 Convertible Preferred Shares were issued for consideration of \$250 before fees of \$12. These Convertible Preferred Shares are convertible into 10,747,346 common shares, based on the conversion ratio applicable as at December 31, 2006.

For accounting purposes, the Convertible Preferred Shares are presented as a compound instrument. At the date of issuance, the value ascribed to the holders' conversion option, which is presented as equity, was \$123 less allocated fees of \$6; the value ascribed to the financial liability was \$127. The Convertible Preferred Shares will increase by 5% per annum, compounded semi-annually from the date of issuance ("Fully Accreted Value") resulting in an accretion on the financial liability at an effective interest rate of 12%. The financial liability amounted to \$166 at December 31, 2006 (\$148 at December 31, 2005).

Each preferred share shall confer on its holder the right to that number of votes as is equal to the number of ACE shares into which each preferred share held by such holder could be converted on the date for determination of shareholders entitled to vote at the meeting or on the date of any written consent, based on the conversion ratio in effect on such date; provided, however, that if any Convertible Preferred Shares are held by persons who are not Canadians, such Convertible Preferred Shares shall be subject to the same proportionate reduction in voting percentage as described for Class A Variable Voting Shares above as if, for voting purposes only, such Convertible Preferred Shares had been converted into Class A Variable Voting Shares.

The Convertible Preferred Shares may be converted at any time, at the option of the holder thereof, into fully paid and non-assessable Class B Voting Shares (if the holder is a Canadian) or fully paid and non-assessable Class A Variable Voting Shares (if the holder is not a Canadian) at the conversion ratio applicable upon the date of conversion. The conversion price is 130% of the subscription price (\$20) of each Class B Voting Share under the 2004 Rights Offering. The conversion is based upon the Fully Accreted Value at the time of conversion.

Mandatory Conversion

The holders of the Convertible Preferred Shares will be required to convert the Convertible Preferred Shares into fully paid and non-assessable common shares at the conversion ratio applicable upon the date of conversion, if the closing price of the ACE shares on the principal market for each of thirty consecutive trading days exceeded 175% of the conversion price.

The Convertible Preferred Shares will also be subject to mandatory conversion into fully paid and non-assessable common shares within ten days of each mandatory conversion date, at the conversion ratio applicable upon the date of conversion, upon the following terms and conditions:

- if the closing price of the ACE shares on the principal market exceeds the Fully Accreted Value of a
 preferred share on at least thirty of the one hundred trading days immediately prior to a particular
 mandatory conversion date; or
- if the closing price of the ACE shares on the principal market does not exceed the Fully Accreted Value of a preferred share on at least thirty of the one hundred trading days immediately prior to a particular

mandatory conversion date, (i) the holders of the Convertible Preferred Shares will not be required to convert their Convertible Preferred Shares into ACE shares and (ii) as of such mandatory conversion date, the then applicable conversion price shall be automatically reduced by 3.75%; and

- if the closing price of the ACE shares on the principal market does not exceed the Fully Accreted Value of a preferred share on at least thirty of the one hundred trading days immediately prior to the final maturity date, then holders of Convertible Preferred Shares will be entitled, upon written notice to ACE given within ten days following the final maturity date, to require ACE to redeem each of the Convertible Preferred Shares in cash at a redemption price equal to the Fully Accreted Value as of the final maturity date.

The first mandatory conversion date is seven years from the date of issuance.

Subject to the rights, privileges, restrictions and conditions attaching to the shares of ACE ranking prior to the Convertible Preferred Shares, upon the liquidation, dissolution or winding-up or distribution of the assets of ACE, the holders of the Convertible Preferred Shares will be entitled to receive, prior to and in preference to the holders of ACE shares, an amount equal to the Fully Accreted Value of the Convertible Preferred Shares as of the date of the liquidation, dissolution, winding-up or distribution.

The holders of Convertible Preferred Shares participate on an as-converted basis with respect to all dividends, distributions, spin-off, split-off, subscription rights or other offers made to holders of Class A Variable Voting Shares and Class B Voting Shares and any other similar transactions.

(c) Convertible Notes

During 2005, the Corporation issued \$330 of Convertible Senior Notes due 2035 ("Convertible Notes") for net proceeds of \$319. For accounting purposes, the Convertible Notes are presented as a compound instrument with the conversion option reflected in other equity above. Refer to Note 7 for additional information.

(d) Adjustment to Shareholders' Equity

Under fresh start reporting, the balance in shareholders' equity after a comprehensive revaluation is adjusted to the net value of identifiable assets and liabilities. Section 1625 of CICA Handbook, Comprehensive Revaluation of Assets and Liabilities, does not permit goodwill to be recorded even if the fair value of net assets is less than the fair value of the enterprise as a whole.

During 2006, as a result of a review of outstanding provisions recorded at the time of exiting CCAA on September 30, 2004, it was determined that a portion of the provision amounting to \$38 (\$23 related to labour related programs) was no longer required. The amount reversed has been applied against Share capital as these amounts related to plans established before the application of fresh start reporting.

13. EARNINGS PER SHARE

The following table outlines the calculation of basic and diluted earnings per share:

(in millions, except per share amounts)	2006	2005
Numerator:		
Numerator for basic earnings per share:		
Income for the year	\$ 408	\$ 261
Effect of potential dilutive securities:		
Stock options	-	-
Convertible preferred shares	23	11
Convertible notes	27	15
Add back anti-dilutive impact:		
Convertible notes	-	(15)
Adjusted earnings for diluted earnings per share	\$ 458	\$ 272
Denominator: Denominator for basic earnings per share: Weighted-average shares	102	98
Effect of potential dilutive securities:	4	4
Stock options	11	10
Convertible preferred shares Convertible notes	7	5
	′ _	5
Add back anti-dilutive impact: Convertible notes		(F)
	101	(5)
Adjusted weighted-average shares for diluted earnings per share	121	109
Basic earnings per share	\$ 4.01	\$ 2.66
Diluted earnings per share	\$ 3.80	\$ 2.48

The calculation of earnings per share is based on whole dollars and not on rounded millions. As a result, the above amounts may not be recalculated to the per share amount disclosed above.

The dilutive effect of outstanding stock options on earnings per share is based on the application of the treasury stock method. Under this method, the proceeds from the exercise of such securities are assumed to be used to purchase Class B Voting Shares.

Excluded from the calculation of diluted earnings per share were 320,886 outstanding options as the option's exercise price was greater than the average market price of the common shares for the year (2005 – 750,000).

14. SEGMENT INFORMATION

A reconciliation of the total amounts reported by each business segment and geographic region to the applicable amounts in the consolidated financial statements follows:

							2006
	Air Canada Services	Aoronian	lozz	ACTS	CIE		Total

Other		41		45
	3	\$ 625	\$	620

Passenger and cargo revenues are based on the actual flown revenue for flights with an origin and destination in a specific country or region. Atlantic refers to flights that cross the Atlantic Ocean with origin and destinations principally in Europe. Pacific refers to flights that cross the Pacific Ocean with origin and destinations principally in Asia.

Other revenues are principally provided to customers located in Canada.

The Air Canada Services segment recorded an impairment loss of \$7 within non-operating expenses on one of its buildings being held for sale in the first quarter of 2007 to ACTS. The impairment loss is reversed within Corporate Items and Eliminations ("CIE") as no impairment exists at the ACE consolidated level for accounting purposes.

Segment Asset Information

Total assets	\$	9,995	\$	674	\$ 504	\$ 381	\$ 293	\$ 11,847

Substantially all of the Corporation's property and equipment are related to operations in Canada.

The total assets of CIE is net of the inter-company eliminations between each of the four segments and ACE.

Composition of Business Segments

The Corporation revised its internal financial reporting structure during 2006, which results in a change to the reportable segments. As a result of the change, the Corporation has four reportable segments: Air Canada Services, Aeroplan, Jazz, and ACTS. The Air Canada Services segment is comprised of the entities previously included within the Transportation Services segment with the exception that the activities of ACE and certain consolidation adjustments, are now included within CIE. As a result of these changes, the comparative segment disclosures have been restated to reflect the current reportable segment structure.

CIE includes the corporate, financing and investing activities of ACE. CIE also includes certain consolidation adjustments related to revenue recognition differences amongst the operating segments. These consolidation adjustments are related to the timing of recognition and the presentation of revenue related to Aeroplan redemptions and the timing of revenue recognition related to maintenance services provided by ACTS (completed contract for engine and component maintenance services) versus the expense recognition in Air Canada and Jazz, which is as the work is completed. CIE also records the non-controlling interest related to ACE's investment in Aeroplan and Jazz. Future income taxes are recorded within the applicable taxable entities and are not allocated to non-taxable entities.

The Aeroplan consolidation adjustments recorded within CIE relate mainly to the revenue recognition timing difference from when Aeroplan records revenues, which is at the time a Mile is redeemed for travel, to the consolidated accounting policy of revenue recognition at the time reward transportation is provided. In addition,

Aeroplan records revenue from the redemption of Miles in Other revenue, whereas on the consolidated financial statements, Miles redeemed for travel on Air Canada and Jazz are recorded in Passenger revenue. This results in an elimination of certain Aeroplan Other revenue amounts within CIE to reflect the consolidated recognition of Aeroplan Miles redeemed for travel on Air Canada and Jazz within Passenger revenue. This also results in an adjustment to passenger revenue recorded within CIE. In the Aeroplan segment information, the cost to Aeroplan of purchasing rewards is recorded in other operating expenses.

Segment financial information has been prepared consistent with how financial information is produced internally for the purposes of making operating decisions. Segments negotiate transactions between each other as if they were unrelated parties.

15. COMMITMENTS

In 2004, Air Canada signed definitive purchase agreements with Embraer — Empresa Brasileira de Aeronautica S.A. ("Embraer") for the acquisition of regional jet aircraft. In November 2005, Air Canada also concluded agreements with The Boeing Company ("Boeing") for the acquisition of Boeing 777 and Boeing 787 aircraft.

Embraer

The agreement with Embraer covers firm orders for 15 Embraer 175 series aircraft as well as 45 Embraer 190 series aircraft. The purchase agreement also contains rights to exercise options for up to 60 additional Embraer 190 series aircraft as well as providing for conversion rights to other Embraer models. As at December 31, 2006, 49 options remain exercisable.

Deliveries of the 15 Embraer 175 series aircraft commenced in July 2005 and the last aircraft was delivered in January 2006. All Embraer 175 deliveries were 80% financed by a third party as described in Note 7.

The Embraer 190 series deliveries commenced in December 2005 and at December 31, 2006, 18 of the Embraer 190 series firm aircraft orders have been completed. For the first 18 firm Embraer 190 deliveries, all of which have been delivered, Air Canada received loans from a syndicate of banks and the manufacturer covering 80% of the capital expenditure as described in Note 7.

Certain aircraft deliveries which were planned to be completed by November 2007 have been delayed with the last delivery expected by January 2008 and the impact of these delays has been reflected in the projected committed capital expenditures table below. These projections are based on estimates using information currently available and are subject to change.

Air Canada also received loan commitments from a third party for an additional 18 Embraer 190 series firm aircraft covering approximately 80% of the capital expenditure to be repaid in quarterly installments for a 12-year term. Financing for a maximum of five of these aircraft may be based on fixed rates while the remaining 13 aircraft will be based on floating rates. The borrowings bear interest at the 90-day US LIBOR plus 1.90% or the fixed rate equivalent.

Air Canada also received loan commitments from a syndicate of banks for the remaining nine Embraer 190 series firm aircraft to cover approximately 80% of the capital expenditure and to be repaid in quarterly installments for a 12-year term. The borrowings bear interest either at the 90-day US LIBOR plus 1.70% or the fixed rate equivalent.

Boeing

In November 2005, Air Canada concluded agreements with Boeing for the acquisition of up to 36 Boeing 777 aircraft and up to 60 Boeing 787 aircraft.

The order for the 36 Boeing 777 aircraft is comprised of firm orders for 18 aircraft plus purchase rights for 18 more, in a yet-to-be determined mix of the 777 family's newest models. As of December 31, 2006, Air Canada has confirmed with Boeing the delivery of eight Boeing 777-300ER aircraft and six Boeing 777-200LR aircraft. The models of the remaining four Boeing aircraft are yet to be determined. Delivery of the first Boeing 777 aircraft is scheduled for March 2007.

The order for the 60 Boeing 787 aircraft is comprised of firm orders for 14 aircraft plus options and purchase rights for an additional 46 aircraft. Air Canada's first Boeing 787 aircraft is scheduled for delivery in 2010.

Air Canada has received financing commitments from Boeing and the engine manufacturer for all firm aircraft orders covering approximately 90 percent of the capital expenditure. This available financing would be at an interest rate of 9.86 percent, based on interest rates as at December 31, 2006. The term to maturity would be 15 years with principal payments made on a mortgage style basis resulting in equal installment payments of principal and interest over the term to maturity. In November 2006, Air Canada made an application for loan guarantee support from the Export-Import Bank of the United States for the first seven Boeing 777 aircraft deliveries in 2007. The loan guarantee, if provided, would cover a 12-year loan term for 85% of the capital expenditure at an interest rate of approximately 5.36%, based on interest rates as at December 31, 2006.

Air Canada has signed a 10-year lease for one Boeing 777-300ER from International Lease Finance Corporation ("ILFC"), which is scheduled to be delivered in May 2007.

Aircraft Interior Refurbishment Program

In addition to acquiring new aircraft, Air Canada commenced a major refurbishment of the interior of its existing aircraft in April 2006. All existing aircraft, except for the Airbus A340 aircraft, will have refurbished interiors. The aircraft refurbishment program is scheduled to be completed by the middle of 2008. The capital expenditure associated with this program will be amortized over a five-year period.

Capital Commitments

As at December 31, 2006, the estimated aggregate cost of the future firm deliveries as well as other capital purchase commitments approximates \$5,863 (of which \$4,745 is subject to firm commitment financing). US dollar amounts are converted using the December 31, 2006 noon day rate of CDN\$1.1653. The estimated aggregate cost of aircraft is based on delivery prices that include estimated escalation and, where applicable, deferred price delivery payment interest calculated based on the 90-day LIBOR rate at December 31, 2006. Committed payments are as follows:

	2006
Year ending December 31, 2007	\$ 2,153
Year ending December 31, 2008	1,458
Year ending December 31, 2009	448
Year ending December 31, 2010	933
Year ending December 31, 2011	868
Thereafter	3
	\$ 5,863

Operating Lease Commitments

As at December 31, 2006 the future minimum lease payments under existing operating leases of aircraft and other property amount to \$2,957 (December 31, 2005 — \$3,416) using year end exchange rates.

				2006
		Operating	lease	commitments
	Aircraft	Other property		Total
Year ending December 31, 2007	\$ 406	\$ 66	\$	472
Year ending December 31, 2008	335	58		393
Year ending December 31, 2009	305	43		348
Year ending December 31, 2010	270	34		304
Year ending December 31, 2011	200	25		225
Thereafter	1,072	143		1,215
	\$ 2,588	\$ 369	\$	2,957

Lease payments for aircraft classified as capital leases and variable interest entities for accounting purposes are disclosed in Note 7 "Long-Term Debt and Capital Lease Obligations".

As at December 31, 2006, the future minimum non-cancellable commitments for the next 12 months under the capacity purchase agreements with unaffiliated regional carriers is \$14.

16. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Under its risk management policy, the Corporation manages its exposure to changes in interest rates, foreign exchange rates and jet fuel prices through the use of various derivative financial instruments. The Corporation uses derivative financial instruments only for risk management purposes, not for generating trading profit.

Interest Rate Risk Management

Air Canada enters into forward interest rate agreements to manage the risks associated with interest rate movement on US dollar and Canadian dollar floating rate debt and investments. During 2006 Air Canada entered into 19 interest rate swaps with a notional value of US\$414 to receive floating rates and pay a weighted average fixed rate of 5.81% for the debt to be arranged in relation to the financing of Embraer 190 aircraft between June 2006 and November 2007. The swaps have 15 year terms from the expected delivery date of the aircraft and their maturities range from June 2021 to December 2022. Air Canada intends on settling the interest rate swaps upon delivery of the related aircraft. Air Canada did not apply hedge accounting to these derivative instruments. Before December 31, 2006, 7 of these swaps were settled at net loss of \$4. As at December 31, 2006, the fair value of the remaining 12 swaps is \$13 in favour of the counterparty and is recorded in Other long-term liabilities on the consolidated statement of financial position. The Air Canada Services segment has recognized a net loss of \$17 since inception of these swaps in Quarter 2 2006.

During 2005, Air Canada reached a settlement with a third party related to interest rate swaps that were terminated as a result of Air Canada's filing for CCAA on April 1, 2003. A dispute had arisen following termination between Air Canada and the unrelated third party with respect to replacement arrangements for the swaps. The settlement agreement provided for a payment to Air Canada of US\$8 related to a portion of the net payments Air Canada would have received had the swaps not been terminated. The replacement swaps that were put in place with another unrelated third party had a fair value of \$9 in favour of the Air Canada on inception. As a result of these transactions, the Air Canada Services segment recorded a gain of \$17 net of transaction fees of \$3, which has been included in Deposits and other assets. The swaps have a term to January 2024 and convert lease payments related to two B767 aircraft leases consolidated under AcG-15, from fixed to floating rates. These have not been designated as hedges for accounting purposes. As at December 31, 2006, these two swaps have a fair value of \$4 in favour of Air Canada (December 31, 2005 — \$7 in favour of Air Canada).

During 2006, Jazz entered into interest rate swaps to hedge its exposure to changes in interest rates on its outstanding senior secured credit facility (Note 7). The interest rate swap is with third parties with a notional value of \$115, which has effectively resulted in a fixed interest rate of 7.09% for the term of the senior secured credit facility until February 2, 2009. Effective February 2, 2006, Jazz is applying hedge accounting to these financial instruments and no amount is recorded in these consolidated financial statements. As at December 31, 2006, the fair value of these swaps was less than \$1 in favour of the counterparty.

Foreign Exchange Risk Management

Air Canada enters into certain foreign exchange forward contracts or currency swaps to manage the risks associated with foreign currency exchange rates. As at December 31, 2006, Air Canada had entered into foreign currency forward contracts and option agreements on US\$503 of future purchases in 2007. The fair value of these foreign currency contracts as at December 31, 2006 is \$25 in favour of Air Canada (December 31, 2005 — \$1 in favour of third parties on US\$521 of future purchases in 2006). These derivative instruments have not been designated as hedges for accounting purposes. The unrealized gain has been recorded in foreign exchange.

Air Canada has entered into currency swap agreements for 16 Canadair Regional Jet (CRJ) operating leases until lease terminations between 2007 and 2011. Currency swaps for five CRJ operating leases, with third parties, were put in place on the inception of the leases and have a fair value at December 31, 2006 of \$10 in favour of the third parties (December 31, 2005 — \$13 in favour of the third parties), taking into account foreign exchange rates in effect at that time. Currency swaps for 11 CRJ operating leases with third parties have a fair value at December 31, 2006 of \$3 in favour of Air Canada (December 31, 2005 — \$3 in favour of the Air Canada). These have not been designated as hedges for hedge accounting purposes. The unrealized changes in fair value have been recorded in Foreign exchange gain or loss.

Fuel Price Risk Management

Air Canada enters into contracts with financial intermediaries to manage its exposure to jet fuel price volatility. As of December 31, 2006, Air Canada had collar option and swap structures in place to hedge a portion of its anticipated jet fuel requirements over the 2007 to 2008 period. Since jet fuel is not traded on an organized futures exchange, liquidity for hedging this commodity is mostly limited to a shorter time horizon. Crude oil and heating oil contracts are effective commodities for hedging jet fuel and Air Canada mainly uses these commodities for medium to longer term hedges.

As of December 31, 2006, approximately 39% of Air Canada's anticipated purchases of jet fuel for 2007 were hedged. Air Canada's contracts to hedge anticipated jet fuel purchases over the 2007 period were comprised of jet fuel, heating oil and crude-oil based contract. Air Canada's contracts to hedge anticipated purchases over the 2008 period are all crude oil-based and covered 8% of the first quarter of 2008 anticipated jet fuel purchase requirements.

Hedge accounting was applied prospectively from October 1, 2005. Under hedge accounting, gains or losses on fuel hedging contracts are recognized in earnings as a component of aircraft fuel expense when the underlying jet fuel being hedged is consumed. Prior to the commencement of Air Canada's hedge accounting being applied, an unrealized gain of \$2 was recorded in other non-operating expense during the nine months ended September 30, 2005.

For the year ended December 31, 2006, the Air Canada Services segment recognized a net loss of \$43 as a component of fuel expense on the consolidated statement of operations (net loss of \$3 for the year ended December 31, 2005) on the settlement of matured contracts and amortization of deferred costs. The fair value of Air Canada's fuel hedging contracts as at December 31, 2006 was \$24 (US\$21) in favour of counterparties (2005 – \$3 in favour of third parties).

During 2006, Air Canada entered into two three-way collar option structures which are composed of one short put option, one long call option and one short call option. This structure creates a ceiling on the potential benefits to be realized by Air Canada if commodity prices increase above the threshold of the short call strike price. Due to the ceiling in these derivative instruments, this type of derivative does not qualify as a hedging instrument under GAAP. As at December 31, 2006, one of the three-way collar option structures remains outstanding, the fair value of this derivative instrument is \$1 in favour of the counterparty and is recorded in Accounts payable and accrued liabilities on the consolidated statement of financial position.

During 2005, Air Canada de-designated one contract previously under hedge accounting that was combined into a new net-written option. The net-written option has a fair value less then zero at the time of inception and so it does not qualify as a hedging instrument under GAAP. As at December 31, 2006, the fair value of the net written option was \$2 in favour of the counterparty (2005 – less than \$1 in favour of the counterparty) and is recorded in Accounts payable and accrued liabilities on the consolidated statement of financial position.

The Air Canada Services segment has recognized a net loss of \$3 in non-operating expense during the year ended 2006 for these derivative instruments which do not qualify as hedge accounting instruments.

Concentration of Credit Risk

The Corporation does not believe it is subject to any significant concentration of credit risk. Cash and short-term investments are in place with major financial institutions, Canadian governments and major corporations. Accounts receivable are generally the result of sales of tickets to individuals through geographically dispersed travel agents, corporate outlets, or other airlines, often through the use of major credit cards.

Statement of Consolidated Financial Position Financial Instruments — Fair Values

The carrying amounts reported in the consolidated statement of financial position for cash and short-term investments, accounts receivable and accounts payable approximate fair values due to the immediate or short-term maturities of these financial instruments.

The fair value of long-term debt and capital lease obligations as at December 31, 2006 and December 31, 2005 approximates its carrying value.

Proposed Accounting Policies

The Canadian Institute of Chartered Accountants Accounting Standards Board issued CICA 3855, Financial Instruments – Recognition and Measurement, CICA 3865, Hedges, and CICA 1530, Comprehensive Income, which will be applied by the Corporation for its fiscal years beginning on January 1, 2007. CICA 3855 prescribes when a financial asset, financial liability or non-financial derivative is to be recognized on the balance sheet and the measurement of such amount. It also specifies how financial instrument gains and losses are to be presented. CICA 3865 is applicable for designated hedging relationships and builds on existing Canadian GAAP guidance by specifying how hedge accounting is applied and what disclosures are necessary when it is applied. CICA 1530 introduces new standards for the presentation and disclosure of components of comprehensive income. Comprehensive income is defined as the change in net assets of an enterprise during a reporting period from transactions and other events and circumstances from non-owner sources. It includes all changes in net assets during a period except those resulting from investments by owners and distributions to owners.

When the Corporation adopts the new requirements on January 1, 2007, a new section of shareholders' equity called other comprehensive income will be presented. The new section will include gains and losses related to the mark-to-market of investment securities and cash flow hedges.

The impact of measuring fuel hedging derivatives at fair value on January 1, 2007 will be recognized in opening accumulated other comprehensive income.

The impact of measuring investment securities at fair value on January 1, 2007 will be recognized in opening accumulated other comprehensive income.

Deferred financing costs within deferred charges will be adjusted to the carrying amount of the related long-term debt and after initial recognition the related long-term debt will be amortized using an effective interest method.

The Corporation is currently considering further impacts related to the adoption of such standards on the consolidated financial statements. Prior periods will not be restated for the impact of these new standards.

17. CONTINGENCIES, GUARANTEES AND INDEMNITIES

Contingencies

Investigation by Competition Authorities Relating to Cargo

The European Commission, the United States Department of Justice and the Competition Bureau in Canada, among other competition authorities, are investigating alleged anti-competitive cargo pricing activities, including the levying of certain fuel surcharges of a number of airlines and cargo operators, including Air Canada. Competition authorities have sought or requested information from Air Canada as part of their investigations. Air Canada is cooperating fully with these investigations. Air Canada is also named as a defendant in a number of class action lawsuits that have been filed before the United States District Court and in Canada in connection with these allegations. It is not possible at this time to predict with any degree of certainty the outcome of these proceedings. It is Air Canada's policy to conduct its business in full compliance with all applicable competition laws.

Pay Equity

Complaints filed in 1991 and 1992 with the Canadian Human Rights Commission against Air Canada and the former Canadian Airlines International on behalf of flight attendants at the two airlines alleging discrimination in negotiated wages were referred to the Canadian Human Rights Tribunal in 1996 for inquiry. By agreement of all parties, the inquiry before the Tribunal was limited to whether flight attendants at each airline were in the same establishment as pilots and technical operations personnel. Under the applicable legislation, a complaint can only compare the value of employees work and their wages if they work in the same establishment. In December 1998 the Tribunal found that pilots, flight attendants and technical operations personnel were in different establishments at each airline. This decision was upheld on judicial review by the Federal Court Trial Division, but overturned by the Federal Court of Appeal in 2004. The Supreme Court of Canada in January 2006 dismissed Air Canada's appeal from this latter decision and has remitted the complaints to the Commission for investigation. The value of each employee Corporation's work will be assessed on the basis of the skill, effort and responsibility it demands as well as the conditions under which it is performed. During the restructuring under CCAA, it was agreed that any resolution of the complaints would have no retroactive financial impact prior to September 30, 2004. Air Canada, upon consultation with legal counsel, considers that any investigation will show that it is complying with the equal pay provisions of the Canadian Human Rights Act; however, management is not able to determine the final outcome of the Commission's investigation.

Claim by the Air Canada Pilots Association

In October 2006, the Air Canada Pilots Association ("ACPA") commenced proceedings before the Ontario Superior Court of Justice against Air Canada, ACE and certain members of the board of directors of Air Canada alleging that certain past and future actions are oppressive to them. A variety of remedies were sought against the parties including an injunction to impose, among other things, limits on corporate distributions including those contemplated under the ACE plan of arrangement which became effective on October 10, 2006. Following a hearing in December, 2006, Mr. Justice Cumming of the Ontario Superior Court of Justice dismissed ACPA's application for an injunction and granted Air Canada's motion to dismiss ACPA's claim. ACPA has not appealed the dismissal of the injunction application but has appealed the order dismissing its claim.

Other

Various other lawsuits and claims, including claims filed by various labour groups of Air Canada and Jazz, are pending by and against the Corporation and provisions have been recorded where appropriate. It is the opinion of management that final determination of these claims will not have a significant material adverse effect on the financial position or the results of the Corporation.

Guarantees

With respect to 45 aircraft leases of Air Canada, the difference between the amended rents from the restructuring arrangements and amounts due under the original lease contracts will be forgiven at the expiry date of the leases if no material defaults have occurred. If a material default occurs, this difference plus interest will become due and payable by Air Canada and all future rent will be based on the original contracted rates.

Rent expense is being recorded on the renegotiated lease agreements and any liability would be recorded only at the time management believes the amount is likely to occur.

Guarantees in Fuel Facilities Arrangements

Air Canada participates in fuel facility arrangements operated through fuel facility corporations ("Fuel Facility Corporations"), along with other airlines that contract for fuel services at various major airports in Canada. The Fuel Facility Corporations operate on a cost recovery basis. The purpose of the Fuel Facility Corporations is to own and finance the system that distributes the fuel to the contracting airlines, including leasing the Land Rights under the land lease. The aggregate debt of the five Fuel Facility Corporations in Canada that have not been consolidated by the Air Canada under AcG-15 is approximately \$108 as at December 31, 2006 (2005 \$87), which is the Air Canada's maximum exposure to loss without taking into consideration any cost sharing that would occur amongst the other contracting airlines. Air Canada views this loss potential as remote. Each contracting airline participating in a Fuel Facility Corporation shares pro rata, based on system usage, in the guarantee of this debt.

Under the terms of their respective land leases, the Fuel Facility Corporations have an obligation to restore the land to vacant condition at the end of the lease and to rectify any environmental damage for which it is responsible. If it was found that the Fuel Facility Corporations had to contribute to any remediation costs, each contracting airline would share pro rata, based on system usage, in the costs. For Fuel Facility Corporations that are consolidated, Air Canada has recorded an obligation of \$2 (\$12 undiscounted) representing the present value of the estimated decommissioning and remediation obligations at the end of the lease using an 8% discount rate, with lease term expiry dates ranging from 2032 to 2039. This estimate is based on numerous assumptions including the overall cost of decommissioning and remediation and the selection of alternative decommissioning and remediation approaches. For Fuel Facilities Corporations that are not consolidated, Air Canada will also be responsible for any remediation costs that may be incurred. No amount has been accrued in these financial statements for these future costs.

Indemnification Agreements

Air Canada enters into real estate leases or operating agreements, which grant a license to Air Canada to use certain premises, in substantially all cities that it serves. It is common in such commercial lease transactions for Air Canada as the lessee to agree to indemnify the lessor and other related third parties for tort liabilities that arise out of or relate to the Air Canada's use or occupancy of the leased or licensed premises. Exceptionally, this indemnity extends to related liabilities arising from the negligence of the indemnified parties, but usually excludes any liabilities caused by their gross negligence or willful misconduct. Additionally, Air Canada typically indemnifies such parties for any environmental liability that arises out of or relates to its use or occupancy of the leased or licensed premises.

In aircraft financing or leasing agreements, Air Canada typically indemnifies the financing parties, trustees acting on their behalf and other related parties and/or lessors against liabilities that arise from the manufacture, design, ownership, financing, use, operation and maintenance of the aircraft and for tort liability, whether or not these liabilities arise out of or relate to the negligence of these indemnified parties, except for their gross negligence or willful misconduct. In addition, in aircraft financing or leasing transactions, including those structured as leveraged leases, Air Canada typically provides indemnities in respect of certain tax consequences.

When Air Canada, as a customer, enters into technical service agreements with service providers, primarily service providers who operate an airline as their main business, Air Canada has from time to time agreed to indemnify the service provider against liabilities that arise from third party claims, whether or not these liabilities arise out of or relate to the negligence of the service provider, but excluding liabilities that arise from the service provider's gross negligence or willful misconduct.

Under its general by-laws, the Corporation has indemnification obligations to its directors and officers. Pursuant to such obligations, the Corporation indemnifies these individuals, to the extent permitted by law, against any and all claims or losses (including amounts paid in settlement of claims) incurred as a result of their service to the Corporation.

The maximum amount payable under the foregoing indemnities cannot be reasonably estimated. The Corporation expects that it would be covered by insurance for most tort liabilities and certain related contractual indemnities described above.

18. AIR CANADA IPO

On November 24, 2006 ACE Aviation Holdings Inc. and Air Canada completed an initial public offering of an aggregate 25 million Air Canada shares at \$21 per share for net proceeds of \$491, after offering costs of \$34.

Through the initial public offering, Air Canada sold an aggregate of 9,523,810 Variable Voting Shares and Voting Shares for net proceeds of \$187, after offering costs of \$13. In the secondary offering, ACE sold an aggregate of 15,476,190 Variable Voting Shares and Voting Shares for net proceeds of \$304, after offering costs of \$21. The offering costs incurred were allocated between ACE and Air Canada on a pro rata basis in relation to size of the aggregate offering.

As a result of the Air Canada IPO, ACE recorded a dilution gain of \$25 and a non-controlling interest on the statement of financial position of \$478 as a result of the dilution of its interest in Air Canada. The dilution gain is the net proceeds of the offering in excess of ACE's proportionate carrying value of its investment in Air Canada.

As at December 31, 2006, an aggregate of 100 million Class A Variable Voting Shares and Class B Voting shares in the capital of Air Canada are issued and outstanding. ACE retains control of Air Canada through a 75% ownership interest.

A corporate restructuring occurred in connection with the Air Canada IPO of common shares of Air Canada. Under the corporate restructuring, Air Canada Cargo and Air Canada Ground Handling became wholly owned subsidiaries of Air Canada and ACE transferred a 51 percent ownership in Air Canada Vacations to Air Canada. ACE acquired certain investments held by Air Canada in ACTS for consideration of \$673. In addition, net intercompany balances of \$170 due by ACE to Air Canada Services were settled.

19. JAZZ IPO

ACE completed an initial public offering of the Jazz Air Income Fund ("Jazz Fund") on February 2, 2006. The Jazz Fund subscribed for 23.5 million units of Jazz at a price of \$10.00 per unit for net proceeds of \$218, net of offering costs of \$17. Concurrent with the closing of the initial public offering, Jazz received proceeds of \$113, after fees of \$2, representing the drawing under a new term credit facility (Note 7).

On February 27, 2006, following the exercise of the over-allotment option by the underwriters, the Jazz Fund issued an additional 1.5 million units at a price of \$10.00 per unit for additional net proceeds of approximately \$14. The Jazz Fund is an unincorporated, open-ended trust that indirectly holds 20.3% of the outstanding limited partnership units of Jazz. ACE holds the remaining 79.7% of the outstanding limited partnership units of Jazz.

Certain of the units held by the Corporation (the "Subordinated Units") representing 20% of the units issued and outstanding at the closing were subordinated until December 31, 2006. Distributions on the Subordinated Units are subordinated in favour of the non-subordinated units. Distributions (including in respect of accrued deficiencies in distributions) are only paid by Jazz on the Subordinated Units at the end of the fiscal quarter.

Under the terms of an investor liquidity agreement, the units held by ACE in Jazz, to the extent not subordinated, are exchangeable for Jazz Fund units on a one-to-one basis. The subordinated units of Jazz held by ACE became exchangeable after December 31, 2006. The exchange right expires once all units of Jazz held by ACE have been exchanged. The investor liquidity agreement also provides for registration and other liquidity rights that enable it to require the Jazz Fund to file a prospectus and otherwise assist with a public offering subject to certain restrictions.

ACE recorded a dilution gain of \$220 and a non-controlling interest on the statement of financial position of \$10 as a result of the dilution of its interests in Jazz. The dilution gain is the net proceeds of the offering in excess of ACE's proportionate carrying value of its investment in Jazz. In addition, a future income tax expense of \$10 was recorded.

20. SPECIAL DISTRIBUTION OF AEROPLAN UNITS - MARCH 2006

On February 16, 2006, ACE's Board of Directors declared a special distribution of units of the Aeroplan Income Fund to ACE's shareholders. The distribution of 0.18 Aeroplan unit per Class A variable voting share, Class B voting share, and preferred share (on an as converted basis) of ACE was made as a return of capital and represented in the aggregate approximately 10.1% of the units of Aeroplan Income Fund on a fully diluted basis. The record date for the purpose of the special distribution was March 3, 2006. Based on the closing price of the units of Aeroplan Income Fund on March 3, 2006, the fair value of the units distributed amounted to \$251.

Units of Aeroplan could not be distributed to shareholders of ACE that were resident in the United States. A total of 7,085,111 units of Aeroplan Income Fund, representing those Aeroplan units that would have otherwise been delivered to shareholders of ACE that were resident in the United States, as well as those units of Aeroplan that would have otherwise been delivered to the registered shareholders of ACE holding less than 200 shares in the capital of ACE and any fractional interests in units of Aeroplan, were sold through an orderly sale process on the Toronto Stock Exchange and the net cash proceeds of such sale of units were remitted to shareholders. A total of 20,204,165 Aeroplan units were distributed as part of the special distribution to ACE shareholders, of which 13,119,054 units were delivered to ACE shareholders and the remaining 7,085,111 units were sold on the Toronto Stock Exchange. Following the completion of the distribution, and the funding of Aeroplan's Initial Long Term Incentive Plan as described in Note 11, ACE's direct interest in Aeroplan was 75.3% and Aeroplan Income Fund's interest was 24.7%.

The special distribution to Class A and Class B shareholders totaling 18,347,309 Aeroplan units was a non-monetary non-reciprocal transfer to owners. Non-monetary non-reciprocal transfers to owners are recorded at the carrying amount of the net assets transferred and do not give rise to a gain or loss. As Aeroplan is in a deficit position, in these consolidated financial statements, no amounts have been reflected for this element of the distribution, other than accounting entries relating to future income taxes described below.

The special distribution to preferred shareholders of ACE totaled 1,856,856 Aeroplan units. This transaction was considered a non-reciprocal transfer to non-owners since the holders of the Convertible Preferred Shares are not considered owners of the Corporation for accounting purposes. The transfer was measured at fair value at the date of distribution and resulted in net interest expense of \$4 recorded in 2006 and a reduction to intangible assets of \$4 as a result of the dilution of interests. The net interest expense of \$4 is the fair value of the distribution of \$23 less a gain recorded of \$19, which was the fair value of the distribution in excess of the Corporation's proportionate carrying value of its investment in Aeroplan of \$4 (including fair value adjustments recorded on consolidation) at the time of the distribution.

The special distribution had no cash tax consequences. However, the distribution involved the use of loss carry forwards in ACE giving rise to a reduction in future income tax assets of \$65. Of this amount, \$59 related to the distribution to the Class A and Class B shareholders which was recorded as a reduction in Share capital and Intangible assets in accordance with the Corporation's accounting policy on income taxes. The remaining \$6 relating to the distribution to preferred shareholders was recorded as a future income tax expense in the statement of operations in 2006.

In accordance with the terms of the ACE Convertible Senior Notes, the special distribution and return of capital triggered a conversion rate adjustment (Note 7). This change in the conversion rate did not have any accounting consequences. Similarly, ACE's stock option plan provides for amendments to the exercise price of options and the number of options outstanding (Note 11).

21. SPECIAL CHARGE FOR AEROPLAN MILES

In 2001, Air Canada established Aeroplan Limited Partnership as a limited partnership wholly owned by Air Canada. The Aeroplan loyalty program was previously a division of Air Canada.

Under the Commercial Participation and Services Agreement (CPSA) between Air Canada and Aeroplan, Air Canada retained responsibility for the 103 billion Miles to be redeemed from accumulations up to December 31, 2001. Aeroplan assumed responsibility for all Miles issued beginning January 1, 2002. On December 31, 2001, there were 171 billion Miles outstanding of which, after considering breakage, management estimated that 103 billion Miles would be redeemed.

With the assistance of independent experts, management of Air Canada and Aeroplan re-estimated the number of Miles expected to be redeemed from accumulations up to December 31, 2001. Management now expects that 112 billion Miles will be redeemed compared to the original estimate of 103 billion. Pursuant to the terms of the CPSA, dated June 9, 2004, as amended, the management of Air Canada and Aeroplan have agreed to further amend the terms of the CPSA. Effective October 13, 2006, by amendment, Air Canada has assumed responsibility for the redemption of up to 112 billion Miles and, as a result, recorded a special charge of \$102 for the incremental 9 billion Miles against Operating revenues in the year ended December 31, 2006 and increased Aeroplan deferred revenues. This amendment to the CPSA represents full and final settlement with Aeroplan of Air Canada's obligations for the redemption of pre-2002 Miles. Aeroplan is responsible for any redemption of Miles in excess of the re-estimated 112 billion Miles. The amount of the additional liability was determined by valuing the incremental Miles at the current fair value.

22. AEROPLAN IPO

Disposal of interests in Aeroplan

On June 29, 2005, Aeroplan Limited Partnership ("the Predecessor LP") transferred substantially all of its assets and liabilities into a newly created Aeroplan Limited Partnership ("Aeroplan LP") in exchange for the issuance of 175 million units of Aeroplan LP and the issuance of two promissory notes (the Acquisition Promissory Note in the amount of \$125 and the Working Capital Note in the amount of \$186). The Predecessor LP was liquidated into ACE at closing. The Acquisition Promissory Note was settled on June 29, 2005 from the proceeds of the offering. The Working Capital Note which was due October 31, 2005, was repaid during the third quarter. These transactions and events did not have any accounting consequences on the consolidated financial statements.

On June 29, 2005, the Aeroplan Income Fund ("the Fund") sold 25 million units at a price of \$10.00 per unit for net proceeds of \$232. On June 30, 2005 the underwriters exercised in full their over-allotment option to purchase an additional 3.75 million units at a price of \$10.00 per unit for proceeds of \$38. With the proceeds from the over-allotment option, the Fund purchased 3.75 million units from ACE at a cost of \$38, reducing the number of units held by ACE to 171.25 million. Costs of \$3 incurred in connection with the exercise of the over-allotment option were borne by ACE. The Fund is an unincorporated, open-ended trust established under the laws of the Province of Ontario, created to indirectly acquire and hold an interest in the outstanding units of Aeroplan LP. The Fund, through the Aeroplan Trust, held 14.4% of the outstanding limited partnership units of Aeroplan LP, and ACE held the remaining 85.6% of the outstanding limited partnership units of Aeroplan LP.

Pursuant to the limited partnership agreement, 20% of Aeroplan units were subordinated until December 31, 2006, representing 40 million units held by ACE in favour of the Fund. Distributions on the subordinated units will only be paid by Aeroplan following the end of a fiscal quarter to the extent that Aeroplan has met and paid its distributable cash target to the Fund as the holder of non-subordinated units.

Under the terms of an investor liquidity agreement dated June 29, 2005, the non-subordinated units held by ACE in Aeroplan are exchangeable for Fund units on a one-to-one basis. The Fund has reserved 171.25 million units for the exercise of the exchange right. The subordinated units of Aeroplan held by ACE became exchangeable after December 31, 2006. The exchange right expires once all units of Aeroplan held by ACE have been exchanged. In addition, ACE also has liquidity rights, which require the Trust, on a best efforts basis, to purchase a number of non-subordinated (exchangeable) Aeroplan units for a cash payment equal to the net proceeds of an offering of an equivalent number of units of the Fund. The investor liquidity agreement also provides for registration and piggy-back rights subject to certain restrictions.

In 2005, ACE recorded a dilution gain of \$190 as a result of the dilution of its interests in Aeroplan LP. The dilution gain is the net proceeds of the offering in excess of ACE's proportionate carrying value of its investment in Aeroplan LP, including fair value adjustments recorded on consolidation. In addition, a future income tax expense of \$28 was recorded.

Cash reserves of Aeroplan

In conjunction with the issuance of Units to the Aeroplan Income Fund and the bank financing (refer to note 7) entered into on June 29, 2005, Aeroplan LP established the Aeroplan Miles Redemption reserve ("the Reserve"). As at December 31, 2006 and 2005, the Reserve was \$400 and is included in Cash and cash equivalents and Short-term investments. The amount to be held in the Reserve, as well as the types of securities it may be invested in, are based on policies established by management of Aeroplan LP, which will be reviewed periodically. The Reserve may be used to supplement cash flows generated from operations in order to pay for rewards during unusually high redemption activity associated with Aeroplan Miles. Under the terms of the term facility, described in Note 7, Aeroplan LP was required to deposit the borrowed funds of \$300 into the Reserve. Any deposits of funds in non-Canadian dollar denominated investments have to be hedged.

23. RECONCILIATION OF CANADIAN GAAP TO UNITED STATES GAAP

The consolidated financial statements of the Corporation have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP"), which differ in certain respects from accounting principles generally accepted in the United States ("US GAAP"). The following tables and disclosures represent the principal reconciling items between US GAAP and Canadian GAAP affecting the statement of operations and retained earnings and the statement of financial position, as well as additional disclosures required by US GAAP. A statement of cash flows prepared under US GAAP is not included because the differences from the statement of cash flows prepared under Canadian GAAP are not material.

1. Convertible securities

Preferred Shares

Under Canadian GAAP, as described in Note 12, the convertible preferred shares issued in 2004 are presented as a compound instrument. At the date of issuance, the value ascribed to the holder's conversion option, which is presented in Share capital and other equity was \$123 less allocated fees of \$6; the value ascribed to the financial liability was \$127. Under US GAAP, the convertible preferred shares contain an embedded derivative which has been reported separately as an Other long-term liability at its fair value of \$178 as at December 31, 2006 (\$165 as at December 31, 2005). The convertible preferred shares were initially recorded at \$162 which is the proceeds received less direct costs of issuance and the fair value of the embedded derivative, as of the date of issuance, and is included in Temporary equity as the conditions of redemption are not solely within the control of the Corporation. The adjustment to Deferred charges reflects applying the direct costs of issuance, recorded in Deferred charges under Canadian GAAP, against the amount recorded in Temporary equity.

For the convertible preferred shares, the changes in the fair value of the embedded derivative are included in income and the accretion of the temporary equity to the redemption value over the period to redemption is reflected as a charge to Retained earnings. The change in the fair value of the embedded derivative includes the 5% accretion per annum on the convertible preferred shares.

The adjustment reflects the reversal of interest expense under Canadian GAAP of \$19 (2005 – \$17); the increase in the fair value of the embedded derivative amounted to \$13 (2005 – decrease of \$15); and the amount charged to Retained earnings under US GAAP of \$18 (2005 – \$20).

Convertible Notes

Under Canadian GAAP, as described in Note 7, the convertible notes issued in 2005 are presented as a compound instrument. As the date of issuance, the value ascribed to the holders' conversion option, which is presented in Share capital and other equity, was \$94 less allocated fees of \$2; the value ascribed to the financial liability was \$236. Under US GAAP the convertible notes were initially recorded at \$260 which is the proceeds received before costs of issuance and the fair value of the embedded derivative, as of the date of issuance of \$70. The direct costs of issuance of \$11 are recorded in deferred charges. The adjustment also reflects a decrease to the liability related to the fair value of the embedded derivative amounting to \$4 (2005 – \$7) and reduction to interest expense of \$3 (2005 – \$2). The embedded derivative is reported as an Other long-term liability at its fair value of \$60 as at December 31, 2006 (\$64 as at December 31, 2005).

2. Derivative financial instruments

Under Canadian GAAP, derivative financial instruments that are not part of a designated hedging relationship are recorded at fair value, with changes in fair value recognized currently in income. Under Canadian GAAP, as described in Note 2, derivatives under Air Canada's fuel-hedging program are designated as hedges for accounting purposes and hedge accounting is being applied prospectively from October 1, 2005. Under hedge accounting, gains or losses on fuel hedging contracts are recognized in earnings as a component of aircraft fuel expense when the underlying jet fuel being hedged is used. As described in Note 16, Jazz entered into interest rate swaps to hedge its exposure to changes in interest rates and is applying hedge accounting, under Canadian GAAP, to these derivative financial instruments and as such the fair value of the interest rate swap is not recorded.

Under US GAAP, all derivatives are recorded on the balance sheet at fair value. The Corporation has elected not to designate any derivatives as hedging instruments for US GAAP purposes and as such, changes in the fair value of all derivative financial instruments are recorded in income. The income adjustment of \$19 (2005 - \$11) reflects the net change in the fair value of outstanding derivative contracts, which are recorded in accounts payable under US GAAP in the amount of \$29 in favour of third parties (2005 - \$3 in favour of third parties) and the write-off of the asset recorded under Canadian GAAP of \$1 (2005 - \$8).

3. Jazz dilution gain

As described in Note 19, under Canadian GAAP, ACE recorded a dilution gain of \$220 as a result of the dilution of its interest in Jazz. Under US GAAP, the dilution gain is reduced by \$41 due to the impact of adjusting the non-controlling interest for the portion of goodwill assigned to Jazz.

4. Air Canada dilution gain

As described in Note 18, under Canadian GAAP, ACE recorded a dilution gain of \$25 (\$21 after tax), as a result of the dilution of its interest in Air Canada. Under US GAAP, the dilution gain is decreased by \$202 to a net loss after tax of \$181 due to the impact of adjusting the non-controlling interest for the portion of additional net assets of Air Canada under US GAAP; which are primarily related to goodwill.

5. Aeroplan dilution gain

As described in Note 22, under Canadian GAAP, in the year ended December 31, 2005 ACE recorded a dilution gain of \$190 as a result of the dilution of its interest in Aeroplan LP. Under US GAAP, the dilution gain is reduced by \$82 as a result of the 14.4% disposal of the goodwill that was allocated to the Predecessor LP at fresh start reporting. In addition, the future income tax expense of \$28 as reported under Canadian GAAP is reduced by \$22 to \$6 as a result of the disposal of goodwill. For US GAAP purposes the dilution gain is \$108 less tax of \$6.

6. Special distribution of Aeroplan units

Under Canadian GAAP, as described in Note 20, ACE's Board of Directors declared a special distribution of units of the Aeroplan Income Fund to ACE's shareholders. The special distribution to Class A and Class B shareholders is a non-monetary non-reciprocal transfer to owners, which is recorded at the carrying amount of the net assets transferred and does not give rise to a gain or loss. As Aeroplan LP is in a deficit position, in these consolidated financial statements, no amounts have been reflected for this element of the distribution, other than accounting entries relating to future income taxes described below.

Under Canadian GAAP, the special distribution to preferred shareholders of ACE is considered a non-reciprocal transfer to non-owners since the host instrument is classified as debt for accounting purposes. This results in net interest expense of \$4 and a reduction to intangible assets of \$4. Under US GAAP, the special distribution to preferred shareholders of ACE is considered a non-monetary non-reciprocal transfer to owners since the host instrument is classified as temporary equity for accounting purposes. Consistent with the accounting treatment of the special distribution for Class A and Class B shareholders, a non-monetary non-reciprocal transfer to owners is recorded at the carrying amount of the net assets transferred and does not give rise to a gain or loss. The adjustment under US GAAP is a reduction to net interest expense of \$4 and an increase to intangible assets of \$4.

Under Canadian GAAP, a \$65 reduction in future income tax assets was recorded, consisting of a \$59 reduction in Share capital and Intangible assets for the portion related to the distribution to the Class A and Class B shareholders and \$6 future income tax expense and reduction to Intangible assets for the portion related to the distribution to preferred shareholders. Under US GAAP, the \$65 reduction in future income tax assets results in a \$65 reduction of Share capital and Goodwill. The adjustment for US GAAP is a \$65 increase in Intangible assets, a \$65 decrease in Goodwill; a \$6 decrease in future income tax expense and a \$6 decrease in Share capital.

7. Stock-based compensation

Under Canadian GAAP, as described in Note 2, the Corporation has adopted EIC-162 in the period ended June 30, 2006 with restatement of prior periods. EIC-162 requires that the compensation cost for a stock option award attributable to an employee who is eligible to retire at the grant date be recognized on the grant date or for an employee who will become eligible to retire during the vesting period be recognized over the period from the grant date to the date the employee becomes eligible to retire (the "non-substantive vesting period approach").

Under US GAAP, the Corporation adopted Statement of Financial Accounting Standards ("FAS") No. 123 (revised 2004), "Share-Based Payment" ("FAS 123R") on January 1, 2006, which has the same requirements as EIC-162 under Canadian GAAP except FAS 123R is to be applied prospectively from January 1, 2006 to new option awards that have retirement eligibility provisions. The nominal vesting period approach is continued for any option awards granted prior to adopting FAS 123R and for the remaining portion of unvested outstanding options. Under US GAAP, the adjustment reflects the reversal of the charge to retained earnings of \$16 as at January 1, 2005 (\$13 as at January 1, 2006) an increase to Salaries, wages and benefits expense of \$3 for the year ended December 31, 2005 and an increase to Salaries, wage and benefits expense of \$7 for the year ended December 31, 2006, all with an offset to contributed surplus.

Under US GAAP, the impact of applying the non-substantive vesting period approach for awards granted after January 1, 2006 compared to the nominal vesting period approach is an increase to Salaries, wage and benefits expense of \$5 for the year ended December 31, 2006. The Salaries, wage and benefits expense for the year ended December 31, 2006 would decrease by \$7 had the non-substantive vesting period approach been applied retroactively to 2005 and 2004 stock options granted.

8. Aircraft leases

Under Canadian GAAP, when a lease is extended and the payment terms are modified, the lessee should continue to account for the lease in accordance with the terms of the original lease contract until the original lease term expires. The difference between the modified payment and the payment under the terms of the original lease is deferred. Under US GAAP, any straight-line rent accruals and other deferred amounts should be amortized over the combined period of the remaining original lease term and the new lease term. Under US GAAP, additional aircraft lease expense of \$3 has been recorded with the offset to deferred charges for the year ended December 31, 2006 (2005 -nil).

Fresh start reporting and goodwill

Under Canadian GAAP, upon emergence from creditor protection, the identifiable assets and liabilities of an enterprise are revalued based on the fair values of such assets and liabilities in a manner similar to that used for a business combination. The difference between the fair value of the Corporations' equity over the fair value of the identifiable assets and liabilities is not permitted to be recorded as an asset (goodwill) under Canadian GAAP. US GAAP does not prohibit the recognition of goodwill to the extent that the reorganization value exceeds the fair value of the specific tangible and identifiable intangibles of the Corporation. The resulting goodwill under US GAAP is not amortized and is subject to an impairment test on an annual basis or earlier if

an event occurs or circumstances change that would more likely than not reduce the fair value of the respective reporting unit below the carrying amount.

Under Canadian GAAP, the benefit of future income tax assets that exist at fresh start, and for which a valuation allowance is recorded against, will be recognized first to reduce to nil any remaining intangible assets (on a prorata basis) that were recorded upon fresh start reporting with any remaining amount as a credit to shareholders' equity. Under US GAAP the benefit of future income tax assets that exist at fresh start will be recognized first to reduce to nil any goodwill, then intangibles with any remaining amount taken to income.

The adjustment in 2006 includes:

- a cumulative increase to intangibles of \$926 (2005 \$149), less accumulated amortization of \$11 (2005 \$3);
- a cumulative increase to future income tax liabilities of \$88 (2005 \$22);
- a cumulative reduction to goodwill of \$921 which includes a \$21 reduction of the Goodwill balance described in Item 11 (2005 \$144 cumulative reduction, including a goodwill impairment loss of \$12 recorded during 2005 related to goodwill recorded in a reporting unit within the Air Canada Services segment, and an Aeroplan dilution gain adjustment of \$82 and tax adjustment of \$22);
- an increase to future income tax expense of \$1 (2005 decrease of \$19);
- an increase (decrease) to tax expense recorded in Other comprehensive Income of \$45 (2005- \$(60)); and
- a cumulative retained earnings adjustment of \$(77) (2005 \$(2)).

10. Labour related provisions

Under Canadian GAAP, as described in Note 10, a review of outstanding labour provisions implemented prior to September 30, 2004 resulted in a \$23 reversal of the provision applied against Share capital. Under US GAAP, the reversal of the \$23 labour related provision implemented prior to September 30, 2004 is applied to income in the current year.

11. Post-employment benefits

Under Canadian GAAP, the actuarial gains and losses related to post-employment benefits, which are non-accumulating, are amortized over the average expected period that the benefits will be paid. Under US GAAP, the actuarial gains and losses related to post-employment benefits, which are non-accumulating, are included in income in the period that they arise. Under US GAAP, actuarial gains of \$48 are recognized during the year ended December 31, 2006, with an increase of \$69 to Pension and other benefit liabilities and a decrease of \$21 to Goodwill. During the course of preparing the 2006 consolidated financial statements, it was noted that this GAAP difference had not previously been recorded. As a result, this adjustment recognized during the year ended December 31, 2006 includes actuarial gains of \$21 from the period prior to October 1, 2004 that were adjusted to Goodwill and actuarial gains of \$39 for the period ended December 31, 2004 and year ended December 31, 2005 that were recognized in income.

12. Comprehensive income

Under US GAAP, comprehensive income must be reported which is defined as all changes in equity other than those resulting from investments by owners and distributions to owners. Other comprehensive income (loss) for the year ended December 31, 2006 is \$30 less tax of \$45, which is net of a valuation allowance (2005 – \$(114) less tax recovery of \$60). For the years presented, under Canadian GAAP, the Corporation was not permitted to use the concept of comprehensive income. The adjustments to cumulative other comprehensive income relate mainly to the minimum pension liability adjustment described under Item 13 and unrealized gains/losses on available for sale securities described under Item 14.

13. Employee future benefits

Prior to the issuance of the new accounting standard for defined benefit plans as noted below, US GAAP requires the unfunded accumulated benefit obligation to be recorded as additional minimum liability for the years presented in these statements. The excess of the unfunded accumulated benefit obligation over the unrecognized prior service costs is recorded in other comprehensive income. The adjustment results in a \$138 increase less tax of \$64 to other comprehensive income for the change in the additional minimum pension liability from \$246 at December 31, 2005 to \$108 at December 31, 2006.

Under US GAAP, the accrued benefit obligation for the defined benefit pension plans as at December 31, 2006 is \$12,629 (2005 - \$11,959).

As at December 31, 2006, the expected benefit payments for the next five years are as follows:

2007	\$ 653
2008	679
2009	706
2010	734
2011	764
	\$ 3,536

In September 2006, the Financial Accounting Standards Board (FASB) issued FASB Statement 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132 (R)" ("FAS 158"). FAS 158 requires an employer to (i) recognize the overfunded or underfunded status of a defined benefit plan (other than a multiemployer plan) as an asset or liability with changes in that funded status recognized through comprehensive income; and (ii) measure the funded status of a plan as of the year-end date. FAS 158 also specifies additional disclosure requirements. The US GAAP requirement to initially recognize the funded status of a defined benefit plan and to provide the required disclosures is effective as of the end of the fiscal year ending after December 15, 2006. The US GAAP requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. FAS 158 requires prospective application with the transition asset or liability to be recognized in accumulated other comprehensive income in shareholders' equity.

Under Canadian GAAP, the over or under funded status of defined benefit plans are not recognized in the statement of financial position, nor does Canadian GAAP currently require the recognition of other comprehensive income. Under Canadian GAAP, the overfunded or underfunded status of a plan is included in the notes to the financial statements in the form of a reconciliation of the overfunded or underfunded status to amounts recognized in an employer's statement of financial position.

The impact of the adoption of this new statement resulted in the recognition of an additional liability for the unfunded obligation of \$200 for pension plans and \$27 for other postretirement plans and a pension asset for the overfunded obligations of \$86 for pension plans and \$5 for other postretirement plans. The offset of these adjustments resulted in a decrease to accumulated other comprehensive income of \$136. The impact of adopting this new statement does not affect reported US GAAP net income.

The incremental effect of applying FAS 158 on individual line items in the Statement of Financial Position at December 31, 2006 under US GAAP is as follows:

	Bef	ore application of FAS 158		Adjustments	Aft	ter application of FAS 158
Democite and other access	Φ.		Φ.	•	Φ.	
Deposits and other assets	\$	345	\$	91	\$	436
Total assets		15,051		91		15,142
Pension and other benefit liabilities		1,915		227		2,142
Total liabilities		11,414		227		11,641
Accumulated other comprehensive income (loss)		(71)		(136)		(207)
Total shareholders' equity		2,499		(136)		2,363

Net actuarial losses of \$12 included in accumulated other comprehensive loss at December 31, 2006 are expected to be recognized as a component of net periodic benefit cost during the 2007 fiscal year.

14. Available-for-sale securities

Under Canadian GAAP, portfolio investments are accounted for using the cost method. Under US GAAP, portfolio investments classified as available-for-sale securities are carried at market value with unrealized gains or losses reflected in comprehensive income. Under US GAAP, an unrealized gain of \$38 less tax of \$6 for the year ended December 31, 2006 (2005 - \$130 less tax of \$22) has been recorded as a separate component of shareholders' equity and included in other comprehensive income, to reflect the fair value of the US Airways investments held during the year. The fair value of the remaining US Airways investment as at December 31, 2006 is \$31 (\$22 at December 31, 2005). This adjustment is in addition to a decrease in other comprehensive

income of \$145 less tax of \$24 for the year ended December 31, 2006 (2005 – nil) to reverse the unrealized gains previously recorded in other comprehensive income, as the gain for the disposal of 4.5 million shares during 2006 is realized under Canadian GAAP.

15. Provision for loss on assets

Under Canadian GAAP, provisions for loss on assets are permitted to be classified as non-operating. Under US GAAP, provisions for loss on assets are classified as operating. Accordingly, under US GAAP operating income would be decreased by \$4 (2005 - \$28).

16. Earnings per share

(in millions, except per share amounts)	2006	2005
Numerator:		
Numerator for basic earnings per share:		
Income for the year	\$ 223	\$ 210
Accretion of convertible preferred shares (a)	(18)	(16)
Adjusted numerator for earnings per share	205	194
Effect of potential dilutive securities:		
Convertible preferred shares (b)	18	16
Convertible notes (b)	24	13
Add back anti-dilutive impact	(24)	(13)
Adjusted earnings for diluted earnings per share	\$ 223	\$ 210
Denominator:		
Denominator for basic earnings per share:		
Weighted-average shares	102	98
Effect of potential dilutive securities:		
Convertible preferred shares	10	10
Convertible notes	7	5
Stock options	1	1
Add back anti-dilutive impact:	(7)	(5)
Adjusted weighted-average shares for diluted earnings per share	113	109
Basic earnings per share	\$ 2.01	\$ 1.98
Diluted earnings per share	\$ 1.97	\$ 1.92

- (a) Income is reduced by the accretion of the convertible preferred shares under US GAAP to obtain income available to common share holders.
- (b) The adjustment to the numerator under US GAAP is different than the adjustment to the numerator under Canadian GAAP due to the difference in the value recorded at inception as described in item 1 and the difference in accretion rates.

The calculation of earnings per share is based on whole dollars and not on rounded millions. As a result, the above amounts may not be recalculated to the per share amount disclosed above.

17. Supplementary information under US GAAP

Accounts payable and accrued liabilities

The components of accounts payable and accrued liabilities at December 31 are as follows:

	2006	2005
Trade payables	\$ 413	\$ 356
Accrued liabilities	203	192
Payroll related liabilities	542	508
Other	418	302
	\$ 1,576	\$ 1,358

Consolidated statement of operations

The components of depreciation, amortization and obsolescence for the years presented below are as follows:

	2006	2005
Depreciation of tangible assets	\$ 467	\$ 374
Amortization of intangible assets	103	98
Obsolescence provision on spare parts, materials and supplies	14	13
	\$ 584	\$ 485

The components of other operating expenses for years presented below are as follows:

	2006	2005
Terminal handling and services	\$ 208	\$ 201
Building rent and maintenance	132	125
Flight and cabin crew expense	135	121
Credit card fees	171	158
Miscellaneous fees and services	124	104
Advertising and promotion (a)	90	75
Customer maintenance and materials	125	82
Other	720	714
	\$ 1,705	\$ 1,580

(a) Advertising and promotion costs are expensed when incurred.

Rent expense

Rent expense, including aircraft rent, building and other equipment rentals, for the year ended December 31, 2006 amounts to \$576 (2005 - \$557).

Valuation and qualifying accounts and reserves

	Balance at beginning of year		Additions charged to costs and expenses		Deductions / Other		Balance at end of year	
Allowance for obsolescence of spare parts, materials and supplies								
Year ended December 31, 2005	\$	3	\$ 13	\$	-	\$	16	
Year ended December 31, 2006	\$	16	\$ 14	\$	-	\$	30	
Allowance for uncollectible accounts								
Year ended December 31, 2005	\$	16	\$ 2	\$	(5)	\$	13	
Year ended December 31, 2006	\$	13	\$ 1	\$	(9)	\$	5	
Future income tax valuation allowance								
Year ended December 31, 2005	\$	2,334	\$ -	\$	(17)	\$	2,317	
Year ended December 31, 2006	\$	2,317	\$ -	\$	(711)	\$	1,606	

18. New accounting policies

Accounting for certain hybrid financial instruments

In February 2006, the Financial Accounting Standards Board (FASB) issued FASB Statement 155, "Accounting for Certain Hybrid Financial Instruments – an amendment of FASB Statement No. 133 and 140" ("FAS155"), which permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, with changes in fair value recognized in earnings. The fair-value election will eliminate the need to separately recognize certain derivatives embedded in hybrid financial instruments under FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities. FAS 155 is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The Corporation will adopt this standard as of Quarter 1 2007 and is in

the process of assessing the impact of adopting this standard on the consolidated financial position and results of operations.

Accounting for uncertainty in income taxes

In June 2006, the FASB issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109" ("FIN 48"). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, "Accounting for Income Taxes." The interpretation prescribes a recognition threshold and measurement attribute for the financial statement accounting guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Corporation will adopt this standard as of Quarter 1 2007 and is in the process of assessing the impact of adopting this standard on the consolidated financial position and results of operations.

Accounting for planned major maintenance activities

In September 2006, the FASB issued FASB Staff Position (FSP) AUG AIR-1, "Accounting for Planned Major Maintenance Activities", which amends certain provisions in the AICPA Industry Audit Guide, Audits of Airlines (Airline Guide), and APB Opinion No. 28 Interim Financial Reporting. This FSP prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities in annual and interim financial reporting periods. This FSP is effective the first fiscal year beginning after December 15, 2006 and shall be applied retrospectively for all financial statements presented. This FSP does not change the current practice of accounting for planned major maintenance activities for the Corporation and therefore does not impact the consolidated financial position and results of operations.

Fair value measurements

In September 2006, the FASB issued FASB Statement 157, "Fair Value Measurements" ("FAS 157"), which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements, the Board having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements, however, for some entities, the application of this Statement will change current practice. FAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Corporation will adopt this standard as of Quarter 1 2008 and is in the process of assessing the impact of adopting this standard on the consolidated financial position and results of operations.

24. SUBSEQUENT EVENTS

Initial Distribution of Units of Aeroplan Income Fund Under Plan of Arrangement

At a special meeting of shareholders on October 5, 2006, the shareholders of the Corporation approved a statutory arrangement pursuant to the Canada Business Corporations Act. On October 6, 2006, the Québec Superior Court issued a final order approving the statutory arrangement, which became effective October 10, 2006. The arrangement grants authority to the board of directors of ACE to make from time to time one or more special distributions to ACE shareholders in an aggregate amount of up to \$2 billion by way of reduction of the stated capital of the Class A variable voting shares, Class B voting shares and the preferred shares of ACE.

On December 28, 2006, ACE announced the terms of a distribution of 50,000,000 units of Aeroplan Income Fund to ACE shareholders under the statutory plan of arrangement approved by ACE's shareholders at the special meeting held on October 5, 2006. As a result, on this date the Corporation exchanged 50,000,000 units of Aeroplan LP into 50,000,000 units of Aeroplan Income Fund, see Note 1 (this exchange is not recognized for accounting purposes).

ACE shareholders, on January 10, 2007, the record date for the distribution, received a non-cash distribution of approximately 0.442 units of Aeroplan Income Fund per Class A variable voting share, Class B voting share and preferred share (on an as converted basis) of ACE. Based on a closing price of \$17.97 per unit of Aeroplan Income Fund on the Toronto Stock Exchange on January 10, 2007, the distribution is valued at approximately \$899 million or \$7.95 per ACE share.

After the distribution, in aggregate ACE holds a 50.3% interest in Aeroplan LP, comprised of a 20.3% direct interest in Aeroplan LP and a 37.6% direct interest in Aeroplan Income Fund.

In connection with the initial distribution under the plan of arrangement, the conversion rate of ACE's 4.25% Convertible Senior Notes Due 2035 was adjusted from 22.2838 to 27.6987 Class A variable voting shares or Class B voting shares per \$1,000 principal amount of convertible notes. The adjustment is effective January 29, 2007 and has been determined in accordance with the terms of the indenture governing the convertible senior notes. In a consistent manner, the exercise price of ACE stock options and the number of options outstanding have been adjusted.

Investment in Aeroman

On December 4, 2006 ACTS and Grupo TACA Holdings Limited ("Grupo TACA") of El Salvador entered into an agreement for ACTS to acquire 80 percent of Grupo TACA's aircraft maintenance division, Aeromantenimiento, S.A ("Aeroman"). Total consideration includes cash and a right to acquire an equity stake in ACTS. The cash component of US\$45 millionl consists of cash of US\$43 million on closing and a milestone payment of up to US\$2 million, funded by ACTS through ACE's available cash resources. The size of the equity stake in ACTS will be confirmed at the time of the monetization of ACTS and is expected to represent less than 7 percent of the total equity of ACTS. Prior to ACTS' monetization, Grupo TACA can put its right to acquire equity back to ACE at a discounted value from US\$40 million and accreting up to a cap of US\$51 million over 12 months or the date of monetization, if earlier. On February 13, 2007, ACTS completed the acquisition of Aeroman.
